Subject Index

Volume 11 January–December 1991

A

α_2-plasmin inhibitor–plasmin complex
Transient Increase of Plasma Lipoprotein(a) in Patients With Unstable Angina Pectoris: Does Lipoprotein(a) Alter Fibrinolysis?, 1772

Abdominal aorta
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237

Acetyl low density lipoproteins
Vastatins Inhibit Cholesterol Ester Accumulation in Human Monocyte-Derived Macrophages, 146

Acetylated low density lipoprotein receptor
Lipoprotein Receptors of HL-60 Macrophages: Effect of Differentiation With Tetramyristic Phorbol Acetate and 1,25-Dihydroxyvitamin D_3, 995

Acetylcholine
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154

Actin
Dynamics of Shear-Induced Redistribution of F-Actin in Endothelial Cells In Vivo, 1814

Acyl-coenzyme A:cholesterol *O*-acyltransferase
Comparison of CI-976, an ACAT Inhibitor, and Selected Lipid-Lowering Agents for Antiatherosclerotic Activity in Iliac–Femoral and Thoracic Aortic Lesions: A Biochemical, Morphological, and Morphometric Evaluation, 1830

Adhesion
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254

Adhesive proteins
Thrombin-Induced Platelet Aggregates Have a Dynamic Structure: Time-Dependent Redistribution of Glycoprotein IIb–IIIa Complexes and Secreted Adhesive Proteins, 704

Adipose distribution
Central Adipose Distribution Is Related to Coronary Atherosclerosis, 327

ADP
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639

Adults
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Aerobic exercise
Effects of Exercise Training on Cardiovascular Function and Plasma Lipid, Lipoprotein, and Apolipoprotein Concentrations in Premenopausal and Postmenopausal Women, 912

African green monkeys
Atherosclerosis: Chronic Effects of Fish Oil and a Therapeutic Diet in Nonhuman Primates, 719

Ag polymorphisms
Identification of the Base Substitution Responsible for the Ag(x/y) Polymorphism of Apolipoprotein B-100, 379

Ag(x/y)
Identification of the Base Substitution Responsible for the Ag(x/y) Polymorphism of Apolipoprotein B-100, 379

Age
Age and Dietary Polyunsaturated Fat Alter High Density Lipoprotein Subfraction Cholesterol Concentrations in a Pediatric Population of African Green Monkeys, 617

Albumin concentration
Reduction of Transmural ^{125}I-Albumin Concentration in Rat Aortic Media by Chronic Hypertension, 334

Allograft
Chronic Rejection in Rat Aortic Allografts: An Experimental Model for Transplant Arteriosclerosis, 671

Angiogenesis
Modulation of Extracellular Matrix Proteins by Endothelial Cells Undergoing Angiogenesis In Vitro, 805

Angiographic interpretation
Evaluation of Human Panelists in Assessing Coronary Atherosclerosis, 385

Angioplasty
Effects of Serotonin-Receptor Blockade on Angioplasty-Induced Vasospasm in an Atherosclerotic Rabbit Model, 770

Antiatherosclerosis
Comparison of CI-976, an ACAT Inhibitor, and Selected Lipid-Lowering Agents for Antiatherosclerotic Activity in Iliac–Femoral and Thoracic Aortic Lesions: A Biochemical, Morphological, and Morphometric Evaluation, 1830

Antibodies
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316

Antibody titers
Chlamydia pneumoniae Strain *TWAR* Antibody and Angiographically Demonstrated Coronary Artery Disease, 547

Antigens
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745

Antioxidants
Attenuation of Atherosclerosis in a Modified Strain of Hypercholesterolemic Watanabe Rabbits With Use of a Probucol Analogue (MDL 29,311) That Does Not Lower Serum Cholesterol, 1266
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322
The Antioxidant Butylated Hydroxytoluene Protects Against Atherosclerosis, 15

Antithrombin I
A Role for Platelets and Thrombin in the Juvenile Stroke of Two Siblings With Defective Thrombin-Adsorbing Capacity of Fibrin(ogen), 785

Aorta
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123
Reduction of Transmural ^{125}I-Albumin Concentration in Rat Aortic Media by Chronic Hypertension, 334
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

Aortic aneurysms
Connective Tissue Proteinases and Inhibitors in Abdominal Aortic Aneurysms: Involvement of the Vasa Vasorum in the Pathogenesis of Aortic Aneurysms, 1667

Aortic transplantation
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Apolipoprotein A-I
Characterization of a Human High Density Lipoprotein–Associated Protein, NA1/NA2: Identity With SP-40,40, an Inhibitor of Complement-Mediated Cytolysis, 645
Hepatic Lipase Promotes a Loss of Apolipoprotein A-I From Triglyceride-Enriched Human High Density Lipoproteins During Incubation In Vitro, 415
Increase in Plasma Cholesteryl Ester Transfer Protein During Probucol Treatment: Relation to Changes in High Density Lipoprotein Composition, 476
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123

Apolipoprotein A-II
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123

Apolipoprotein B
Identification of the Base Substitution Responsible for the Ag(x/y) Polymorphism of Apolipoprotein B-100, 379
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123
Mechanisms of Hypertriglyceridemia in the Coconut Oil/Cholesterol-Fed Rabbit: Increased Secretion and Decreased Catabolism of Very Low Density Lipoprotein, 918
Overproduction of a Buoyant Low Density Lipoprotein Subspecies in Spontaneously Hypercholesterolemic Mutant Pigs, 351
Serum Low Density Lipoprotein Cholesterol Level and Cholesterol Absorption Efficiency Are Influenced by Apolipoprotein B and E Polymorphism and by the F Helsinki Mutation of the Low Density Lipoprotein Receptor Gene in Familial Hypercholesterolemia, 1368

Apolipoprotein B haplotypes
Clinical Signs of Familial Hypercholesterolemia in Patients With Familial Defective Apolipoprotein B-100 and Normal Low Density Lipoprotein Receptor Function, 691

Apolipoprotein B/E receptor
Lipoprotein Receptors of HL-60 Macrophages: Effect of Differentiation With Tetramyristic Phorbol Acetate and 1,25-Dihydroxyvitamin D_3, 995

Apolipoprotein C-II
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123

Apolipoprotein C-II–Toronto
Interaction Between Variant Apolipoproteins C-II and E That Affects Plasma Lipoprotein Concentrations, 1303

Apolipoprotein C-III
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123

Apolipoprotein E
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237
Effects of the Apolipoprotein E Polymorphism on Levels of Lipids, Lipoproteins, and Apolipoproteins Among Mexican-Americans in Starr County, Texas, 362
Cholesterol Accumulation in J774 Macrophages Induced by Triglyceride-Rich Lipoproteins: Comparison of Very Low Density Lipoprotein From Subjects With Type III, IV, and V Hyperlipoproteinemias, 221
Fish Oil Supplementation Reduces β–Very Low Density Lipoprotein in Type III Dysbetalipoproteinemia, 864
Genetic and Environmental Factors Affecting the Incidence of Coronary Artery Disease in Heterozygous Familial Hypercholesterolemia, 290
Increase in Plasma Cholesteryl Ester Transfer Protein During Probucol Treatment: Relation to Changes in High Density Lipoprotein Composition, 476
Influences of Common Variants of Apolipoprotein E on Measures of Lipid Metabolism in a Sample Selected for Health, 1100
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123
Plasma Concentrations of Cholesteryl Ester Transfer Protein in Hyperlipoproteinemia: Relation to Cholesteryl Ester Transfer Protein Activity and Other Lipoprotein Variables, 797
Serum Low Density Lipoprotein Cholesterol Level and Cholesterol Absorption Efficiency Are Influenced by Apolipoprotein B and E Polymorphism and by the F Helsinki Mutation of the Low Density Lipoprotein Receptor Gene in Familial Hypercholesterolemia, 1368
Type III Dyslipoproteinemia in Patients Heterozygous for Familial Hypercholesterolemia and Apolipoprotein E2: Evidence for a Gene–Gene Interaction, 1137

Apolipoprotein E phenotype
Interaction Between Variant Apolipoproteins C-II and E That Affects Plasma Lipoprotein Concentrations, 1303
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Apolipoprotein polymorphisms
Apolipoprotein E Polymorphism Association With Lipoprotein Profile in Endogenous Hypertriglyceridemia and Familial Hypercholesterolemia, 272
Effects of Polymorphisms in Apolipoproteins E, A-IV, and H on Quantitative Traits Related to Risk for Cardiovascular Disease, 1330
The Mutation Causing the Common Apolipoprotein A-IV Polymorphism Is a Glutamine to Histidine Substitution of Amino Acid 360, 851

Apolipoprotein(a)
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

Apolipoprotein(a) isoforms
Lipoprotein(a) and Apolipoprotein(a) in a New World Monkey, the Common Marmoset *(Callithrix jacchus)*: Association of Variable Plasma Lipoprotein(a) Levels With a Single Apolipoprotein(a) Isoform, 1030

Apolipoproteins
Effects of the Apolipoprotein E Polymorphism on Levels of Lipids, Lipoproteins, and Apolipoproteins Among Mexican-Americans in Starr County, Texas, 362
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Interaction of LpB, LpB:E, LpB:C-III, and LpB:C-III:E Lipoproteins With the Low Density Lipoprotein Receptor of HeLa Cells, 1021
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138
Use of Serum Lipid and Apolipoprotein Concentrations to Predict Extent of Diet-Induced Atherosclerotic Lesions in Aortas and Coronary Arteries and to Demonstrate Regression of Lesions in Individual Rhesus Monkeys, 467

Apoprotein A-I
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apopro-

tein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719

Apoprotein(a)
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

Arachidonic acid
Passage State Affects Arachidonic Acid Content and Eicosanoid Release in Porcine Aortic Endothelial Cells, 167

Arterial compliance
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Arterial influx/efflux of lipoproteins
Quantitative Studies of Transfer In Vivo of Low Density, Sf 12–60, and Sf 60–400 Lipoproteins Between Plasma and Arterial Intima in Humans, 569

Arterial injury
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91

Arterial media
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Arterial metabolism
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91

Arterial thrombosis
A Role for Platelets and Thrombin in the Juvenile Stroke of Two Siblings With Defective Thrombin-Adsorbing Capacity of Fibrin(ogen), 785

Arterial wall–lipoprotein interactions
Quantitative Studies of Transfer In Vivo of Low Density, Sf 12–60, and Sf 60–400 Lipoproteins Between Plasma and Arterial Intima in Humans, 569

Arteries
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Arteriosclerosis
Chronic Rejection in Rat Aortic Allografts: An Experimental Model for Transplant Arteriosclerosis, 671
Effects of Native and Oxidized Low Density Lipoproteins on Formation and Inactivation of Endothelium-Derived Relaxing Factor, 198
Enhanced Uptake and Impaired Intracellular Metabolism of Low Density Lipoprotein Complexed With Anti–Low Density Lipoprotein Antibodies, 1356
Hypercholesterolemia and Atherosclerosis Change Vascular Reactivity in Rabbits by Different Mechanisms, 1712
The Endothelium of Advanced Arteriosclerotic Plaques in Humans, 1678

Arteriosclerotic plaque
Transforming Potential Is Detectable in Arteriosclerotic Plaques of Young Animals, 1053

Aspirin
Effect of Aspirin and Epinephrine on Experimentally Induced Thrombogenesis in Dogs: A Parallelism Between In Vivo and Ex Vivo Thrombosis Models, 1182
Platelet Function in Watanabe Heritable Hyperlipidemic Rabbits: Decreased Sensitivity to Thromboxane A_2, 610

Atherogenesis
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517
Phagocytosis of Lipase-Aggregated Low Density Lipoprotein Promotes Macrophage Foam Cell Formation: Sequential Morphological and Biochemical Events, 1643

Atherogenic diet
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91
Molecular Cloning, Sequence, and Expression of Cynomolgus Monkey Cholesteryl Ester Transfer Protein: Inverse Correlation Between Hepatic Cholesteryl Ester Transfer Protein mRNA Levels and Plasma High Density Lipoprotein Levels, 1759

Atherosclerosis
A Nifedipine-Sensitive Smooth Muscle Cell Population Is Present in the Atherosclerotic Rabbit Aorta, 928
Apolipoprotein B Gene Mutations in Austrian Subjects With Heart Disease and Their Kindred, 371
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237
Asymptomatic Atherosclerosis and Insulin Resistance, 1068
Attenuation of Atherosclerosis in a Modified Strain of Hypercholesterolemic Watanabe Rabbits With Use of a Probucol Analogue (MDL 29,311) That Does Not Lower Serum Cholesterol, 1266
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316
Changes in Vasoconstrictor and Vasodilator Responses of the Basilar Artery During Maturation in the Watanabe Heritable Hyperlipidemic Rabbit Differ From Those in the New Zealand White Rabbit, 1147
Characterization of a Human High Density Lipoprotein–Associated Protein, NA1/NA2: Identity With SP-40,40, an Inhibitor of Complement-Mediated Cytolysis, 645
Chlamydia pneumoniae Strain *TWAR* Antibody and Angiographically Demonstrated Coronary Artery Disease, 547
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71
Differential Accumulation of Intimal Monocyte–Macrophages Relative to Lipoproteins and Lipofuscin Corresponds to Hemodynamic Forces on Cardiac Valves in Mice, 947
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892
Enhanced Susceptibility to In Vitro Oxidation of the Dense Low Density Lipoprotein Subfraction in Healthy Subjects, 298
Expression of Monocyte Chemotactic Protein and Interleukin-8 by Cytokine-Activated Human Vascular Smooth Muscle Cells, 1166
Fabric Organization of the Subendothelium of the Human Brain Artery by Polarized-Light Microscopy, 681
Hemin: A Possible Physiological Mediator of Low Density Lipoprotein Oxidation and Endothelial Injury, 1700
High Fasting Plasma Insulin Is an Indicator of Coronary Heart Disease in Non–Insulin-Dependent Diabetic Patients and Nondiabetic Subjects, 80
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663
Interaction of Low Density Lipoproteins With Human Aortic Elastin, 116
Leukocytosis in Rabbits With Diet-Induced Atherosclerosis, 985
Lipoprotein(a) in Diet-Induced Atherosclerosis in Nonhuman Primates, 32
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639
Modulation of Actin Isoform Expression in Cultured Arterial Smooth Muscle Cells by Heparin and Culture Conditions, 244
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254
Overexpression of Low Density Lipoprotein Receptor on Chinese Hamster Ovary Cells Generates Foam Cells, 1310
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778

Reduction of Endothelial Microfilament Bundles in the Low-Shear Region of the Canine Aorta: Association With Intimal Plaque Formation in Hypercholesterolemia, 107
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077
Sluggish Sitosterol Turnover and Hepatic Failure to Excrete Sitosterol Into Bile Cause Expansion of Body Pool of Sitosterol in Patients With Sitosterolemia and Xanthomatosis, 1287
Stimulating Effect of Oxidized Low Density Lipoproteins on Plasminogen Activator Inhibitor–1 Synthesis by Endothelial Cells, 1821
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501
The Antioxidant Butylated Hydroxytoluene Protects Against Atherosclerosis, 15
Ultrasonographically Assessed Carotid Morphology and the Risk of Coronary Heart Disease, 1245
Variable Effects of Different Corticosteroids on Plasma Lipids, Apolipoproteins, and Hepatic Apolipoprotein mRNA Levels in Rats, 760

Atherosclerosis prevention
A Nifedipine-Sensitive Smooth Muscle Cell Population Is Present in the Atherosclerotic Rabbit Aorta, 928

Atherosclerosis regression
A Nifedipine-Sensitive Smooth Muscle Cell Population Is Present in the Atherosclerotic Rabbit Aorta, 928

Autoradiography
Shear Stress Regulates Smooth Muscle Proliferation and Neointimal Thickening in Porous Polytetrafluoroethylene Grafts, 1844

B

Baboons
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23

Basilar artery
Changes in Vasoconstrictor and Vasodilator Responses of the Basilar Artery During Maturation in the Watanabe Heritable Hyperlipidemic Rabbit Differ From Those in the New Zealand White Rabbit, 1147

Behavioral factors
Waist to Hip Ratio in Middle-Aged Women: Associations With Behavioral and Psychosocial Factors and With Changesin Cardiovascular Risk Factors, 1250

B-mode ultrasound
Relation of Extent of Extracranial Carotid Artery Atherosclerosis as Measured by B-Mode Ultrasound to the Extent of Coronary Atherosclerosis, 1786
Ultrasonographically Assessed Carotid Morphology and the Risk of Coronary Heart Disease, 1245

β-very low density lipoproteins
Fish Oil Supplementation Reduces β–Very Low Density Lipoprotein in Type III Dysbetalipoproteinemia, 864
Oxidation of β-Very Low Density Lipoprotein by Endothelial Cells Enhances Its Metabolism by Smooth Muscle Cells in Culture, 279
Type III Dyslipoproteinemia in Patients Heterozygous for Familial Hypercholesterolemia and Apolipoprotein E2: Evidence for a Gene–Gene Interaction, 1137

β–very low density lipoprotein clearance
Increased Removal of β–Very Low Density Lipoproteins After Ethinyl Estradiol Is Associated With Increased mRNA Levels for Hepatic Lipase, Lipoprotein Lipase, and the Low Density Lipoprotein Receptor in Watanabe Heritable Hyperlipidemic Rabbits, 1652

Bile excretion
Enhanced Hepatic Uptake and Processing of Cholesterol Esters From Low Density Lipoprotein by Specific Lactosaminated Fab Fragments, 1806

Binding
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322

Blacks
Relation of Serum Testosterone Levels to High Density Lipoprotein Cholesterol and Other Characteristics in Men, 307

Blood flow
Dynamics of Shear-Induced Redistribution of F-Actin in Endothelial Cells In Vivo, 1814
Enhanced Constriction of the Peripheral Large Artery in Response to Acute Induction of a Low-Flow State in Human Hypercholesterolemia, 161

Blood pressure
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077

Blood velocity
Enhanced Constriction of the Peripheral Large Artery in Response to Acute Induction of a Low-Flow State in Human Hypercholesterolemia, 161

Body fat
The Role of Insulin and Body Fat in Associations of Physical Activity With Lipids and Lipoproteins in a Biethnic Population: The San Luis Valley Diabetes Study, 973

Body fat distribution
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077

Brain artery
Fabric Organization of the Subendothelium of the Human Brain Artery by Polarized-Light Microscopy, 681

Butylated hydroxytoluene
The Antioxidant Butylated Hydroxytoluene Protects Against Atherosclerosis, 15

C

Calcium
Local Modulation of Intracellular Calcium Levels Near a Single-Cell Wound in Human Endothelial Monolayers, 1258

Calpain I
Activation of Calpain I and Hydrolysis of Calpain Substrates (Actin-Binding Protein, Glycoprotein Ib, and Talin) Are Not a Function of Thrombin-Induced Platelet Aggregation, 882

Carbohydrate-induced hypertriglyceridemia
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Carcinogens
Transforming Potential Is Detectable in Arteriosclerotic Plaques of Young Animals, 1053

Cardiac valves
Differential Accumulation of Intimal Monocyte–Macrophages Relative to Lipoproteins and Lipofuscin Corresponds to Hemodynamic Forces on Cardiac Valves in Mice, 947

Cardiovascular disease risk factors
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730

Cardiovascular diseases
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730

Cardiovascular risk
Genetic and Environmental Contributions to Cholesterol and Its Subfractions in 11-Year-Old Twins: The Medical College of Virginia Twin Study, 844

Cardiovascular risk factors
Endogenous Sex Hormones, High Density Lipoprotein Cholesterol, and Other Lipoprotein Fractions in Men, 489
Prevalence of Familial Hyperhomocyst(e)inemia in Men With Premature Coronary Artery Disease, 1129
Risk Factors for Early Carotid Atherosclerosis in Middle-Aged French Women, 966
Waist to Hip Ratio in Middle-Aged Women: Associations With Behavioral and Psychosocial Factors and With Changesin Cardiovascular Risk Factors, 1250

Carotid atherosclerosis
Progression and Regression of Carotid Atherosclerosis in Clinical Trials, 443
Relation of Extent of Extracranial Carotid Artery Atherosclerosis as Measured by B-Mode Ultrasound to the Extent of Coronary Atherosclerosis, 1786
Risk Factors for Early Carotid Atherosclerosis in Middle-Aged French Women, 966

CD11/CD18
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254

Cebus monkeys
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apoprotein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719

Cell activation
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Cell cultures
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316
Passage State Affects Arachidonic Acid Content and Eicosanoid Release in Porcine Aortic Endothelial Cells, 167

Cell differentiation
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Cell injury
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Cerebral
Atherosclerosis: Chronic Effects of Fish Oil and a Therapeutic Diet in Nonhuman Primates, 719

Chemotaxis
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254

Chlamydia pneumoniae
Chlamydia pneumoniae Strain *TWAR* Antibody and Angiographically Demonstrated Coronary Artery Disease, 547

Cholesterol
Age and Dietary Polyunsaturated Fat Alter High Density Lipoprotein Subfraction Cholesterol Concentrations in a Pediatric Population of African Green Monkeys, 617
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apoprotein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719
Effects of the Apolipoprotein E Polymorphism on Levels of Lipids, Lipoproteins, and Apolipoproteins Among Mexican-Americans in Starr County, Texas, 362
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23
Genetic and Environmental Contributions to Cholesterol and Its Subfractions in 11-Year-Old Twins: The Medical College of Virginia Twin Study, 844
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123
Metabolism and Turnover of Cell Surface–Associated Heparan Sulfate Proteoglycan and Chondroitin Sulfate Proteoglycan in Normal and Cholesterol-Enriched Macrophages, 1752
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089
Plasma Triglyceride and Coronary Heart Disease, 2
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077
Sluggish Sitosterol Turnover and Hepatic Failure to Excrete Sitosterol Into Bile Cause Expansion of Body Pool of Sitosterol in Patients With Sitosterolemia and Xanthomatosis, 1287
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

Cholesterol absorption
Serum Low Density Lipoprotein Cholesterol Level and Cholesterol Absorption Efficiency Are Influenced by Apolipoprotein B and E Polymorphism and by the F Helsinki Mutation of the Low Density Lipoprotein Receptor Gene in Familial Hypercholesterolemia, 1368

Cholesterol derivatives
Toxicity of Oxygenated Cholesterol Derivatives Toward Cultured Human Umbilical Vein Endothelial Cells, 423

Cholesterol esterification
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55

Cholesterol esters
Cholesterol Accumulation in J774 Macrophages Induced by Triglyceride-Rich Lipoproteins: Comparison of Very Low Density Lipoprotein From Subjects With Type III, IV, and V Hyperlipoproteinemias, 221

Cholesterol-fed rabbits
The Antioxidant Butylated Hydroxytoluene Protects Against Atherosclerosis, 15

Cholesterol lowering
Attenuation of Atherosclerosis in a Modified Strain of Hypercholesterolemic Watanabe Rabbits With Use of a Probucol Analogue (MDL 29,311) That Does Not Lower Serum Cholesterol, 1266

Cholesterol removal
High Density Lipoprotein Apolipoproteins Mediate Removal of Sterol From Intracellular Pools but Not From Plasma Membranes of Cholesterol-Loaded Fibroblasts, 403

Cholesterol transfer reactions
Plasma Concentrations of Cholesteryl Ester Transfer Protein in Hyperlipoproteinemia: Relation to Cholesteryl Ester Transfer Protein Activity and Other Lipoprotein Variables, 797

Cholesteryl ester transfer
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55

Cholesteryl ester transfer protein
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71
Hepatic Lipase Promotes a Loss of Apolipoprotein A-I From Triglyceride-Enriched Human High Density Lipoproteins During Incubation In Vitro, 415
Increase in Plasma Cholesteryl Ester Transfer Protein During Probucol Treatment: Relation to Changes in High Density Lipoprotein Composition, 476

Molecular Cloning, Sequence, and Expression of Cynomolgus Monkey Cholesteryl Ester Transfer Protein: Inverse Correlation Between Hepatic Cholesteryl Ester Transfer Protein mRNA Levels and Plasma High Density Lipoprotein Levels, 1759
Plasma Concentrations of Cholesteryl Ester Transfer Protein in Hyperlipoproteinemia: Relation to Cholesteryl Ester Transfer Protein Activity and Other Lipoprotein Variables, 797

Cholesteryl esters
Peritoneal Macrophage Cholesteryl Ester Content as a Function of Plasma Cholesterol in Rats, 1111

Chondroitin sulfate
Metabolism and Turnover of Cell Surface–Associated Heparan Sulfate Proteoglycan and Chondroitin Sulfate Proteoglycan in Normal and Cholesterol-Enriched Macrophages, 1752
Specificity of the Low Density Lipoprotein–Glycosaminoglycan Interaction, 561

Chronic rejection
Chronic Rejection in Rat Aortic Allografts: An Experimental Model for Transplant Arteriosclerosis, 671

Chylomicron remnants
Metabolism of Lipoprotein Remnants in Humans: Studies During Intestinal Infusion of Fat and Cholesterol in Subjects With Varying Expression of the Low Density Lipoprotein Receptor, 827
Postprandial Lipoprotein Metabolism in Normolipidemic Men With and Without Coronary Artery Disease, 653

Chylomicrons
Metabolism of Lipoprotein Remnants in Humans: Studies During Intestinal Infusion of Fat and Cholesterol in Subjects With Varying Expression of the Low Density Lipoprotein Receptor, 827
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457
Postprandial Lipoprotein Metabolism in Normolipidemic Men With and Without Coronary Artery Disease, 653
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Cigarette smoking
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730

Circulation
Atherosclerosis: Chronic Effects of Fish Oil and a Therapeutic Diet in Nonhuman Primates, 719

Class II antigens
The Endothelium of Advanced Arteriosclerotic Plaques in Humans, 1678

Clinical trials
Cholesterol-Raising Factor From Boiled Coffee Does Not Pass a Paper Filter, 586
Evaluation of Human Panelists in Assessing Coronary Atherosclerosis, 385
Progression and Regression of Carotid Atherosclerosis in Clinical Trials, 443

Coagulation inhibitors
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

Coarctation
Dynamics of Shear-Induced Redistribution of F-Actin in Endothelial Cells In Vivo, 1814

Cockerels
Transforming Potential Is Detectable in Arteriosclerotic Plaques of Young Animals, 1053

Coffee
Cholesterol-Raising Factor From Boiled Coffee Does Not Pass a Paper Filter, 586

Collagen
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322
Modulation of Extracellular Matrix Proteins by Endothelial Cells Undergoing Angiogenesis In Vitro, 805
Vascular Responses to Platelet Activation in Normal and Atherosclerotic Primates In Vivo, 1745

Collagen lattice
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660

Collagen synthesis
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660

Compactin
Vastatins Inhibit Cholesterol Ester Accumulation in Human Monocyte-Derived Macrophages, 146

Complement
Characterization of a Human High Density Lipoprotein–Associated Protein, NA1/NA2: Identity With SP-40,40, an Inhibitor of Complement-Mediated Cytolysis, 645

Complications
Cardiovascular Disease and Arterial Calcification in Insulin-Dependent Diabetes Mellitus: Interrelations and Risk Factor Profiles: Pittsburgh Epidemiology of Diabetes Complications Study-V, 958

Conjugated dienes
Enhanced Susceptibility to In Vitro Oxidation of the Dense Low Density Lipoprotein Subfraction in Healthy Subjects, 298

Copper
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322

Coronary angiography
Evaluation of Human Panelists in Assessing Coronary Atherosclerosis, 385
High Density Lipoproteins and Coronary Atherosclerosis: A Strong Inverse Relation With The Largest Particles Is Confined to Normotriglyceridemic Patients, 174

Coronary arteriosclerosis
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316

Coronary artery disease
Chlamydia pneumoniae Strain *TWAR* Antibody and Angiographically Demonstrated Coronary Artery Disease, 547
Cholesterol Esterification Rates in Very Low Density Lipoprotein– and Low Density Lipoprotein–Depleted Plasma: Relation to High Density Lipoprotein Subspecies, Sex, Hyperlipidemia, and Coronary Artery Disease, 64
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23
Genetic and Environmental Factors Affecting the Incidence of Coronary Artery Disease in Heterozygous Familial Hypercholesterolemia, 290
High Density Lipoproteins and Coronary Atherosclerosis: A Strong Inverse Relation With The Largest Particles Is Confined to Normotriglyceridemic Patients, 174
Postprandial Lipoprotein Metabolism in Normolipidemic Men With and Without Coronary Artery Disease, 653
Prevalence of Familial Hyperhomocyst(e)inemia in Men With Premature Coronary Artery Disease, 1129

Coronary atherosclerosis
Central Adipose Distribution Is Related to Coronary Atherosclerosis, 327

Relation of Extent of Extracranial Carotid Artery Atherosclerosis as Measured by B-Mode Ultrasound to the Extent of Coronary Atherosclerosis, 1786

Coronary disease
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Coronary heart disease
High Fasting Plasma Insulin Is an Indicator of Coronary Heart Disease in Non–Insulin-Dependent Diabetic Patients and Nondiabetic Subjects, 80
Multifactorial Etiology of Hypercholesterolemia: Implications for Prevention of Coronary Heart Disease, 1619
Plasma Triglyceride and Coronary Heart Disease, 2
Serum Lipoprotein(a) in Patients Heterozygous for Familial Hypercholesterolemia, Their Relatives, and Unrelated Control Populations, 940
Ultrasonographically Assessed Carotid Morphology and the Risk of Coronary Heart Disease, 1245

Coronary heart disease risk
Relation of Fasting Plasma Insulin Concentration to High Density Lipoprotein Cholesterol and Triglyceride Concentrations in Men, 1636

Coronary microvessels
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639

Cyclic AMP
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042

Cyclic GMP
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254

Cynomolgus monkeys
Molecular Cloning, Sequence, and Expression of Cynomolgus Monkey Cholesteryl Ester Transfer Protein: Inverse Correlation Between Hepatic Cholesteryl Ester Transfer Protein mRNA Levels and Plasma High Density Lipoprotein Levels, 1759
Vascular Responses to Platelet Activation in Normal and Atherosclerotic Primates In Vivo, 1745

Cytokines
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Effect of Interleukin-1 on Lipid Metabolism in the Rat: Similarities to and Differences From Tumor Necrosis Factor, 495

Cytoplasmic inclusions
Phagocytosis of Lipase-Aggregated Low Density Lipoprotein Promotes Macrophage Foam Cell Formation: Sequential Morphological and Biochemical Events, 1643

Cytoskeleton
Modulation of Actin Isoform Expression in Cultured Arterial Smooth Muscle Cells by Heparin and Culture Conditions, 244

D

De-endothelializing injury
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530

Density gradient ultracentrifugation
Lipoprotein(a) and Apolipoprotein(a) in a New World Monkey, the Common Marmoset *(Callithrix jacchus):* Association of Variable Plasma Lipoprotein(a) Levels With a Single Apolipoprotein(a) Isoform, 1030

Desialylation
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316

Desmin
Modulation of Actin Isoform Expression in Cultured Arterial Smooth Muscle Cells by Heparin and Culture Conditions, 244

Diabetes
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517
Lipoprotein Lipase Activity in Skeletal Muscle Is Related to Insulin Sensitivity, 1192

Diabetes mellitus, non–insulin-dependent
High Fasting Plasma Insulin Is an Indicator of Coronary Heart Disease in Non–Insulin-Dependent Diabetic Patients and Nondiabetic Subjects, 80

Diabetic macroangiopathy
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91

Dietary coconut oil
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apoprotein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719

Dietary corn oil
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apoprotein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719

Dietary intake
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089

Dietary lipids
Dietary Eicosapentaenoic Acid and Docosahexaenoic Acid From Fish Oil: Their Incorporation Into Advanced Human Atherosclerotic Plaques, 903

1,25-Dihydroxyvitamin D_3
Lipoprotein Receptors of HL-60 Macrophages: Effect of Differentiation With Tetramyristic Phorbol Acetate and 1,25-Dihydroxyvitamin D_3, 995

Dinucleotide repeat polymorphisms
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183

DNA
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183

Dogs
Effect of Aspirin and Epinephrine on Experimentally Induced Thrombogenesis in Dogs: A Parallelism Between In Vivo and Ex Vivo Thrombosis Models, 1182
Reduction of Endothelial Microfilament Bundles in the Low-Shear Region of the Canine Aorta: Association With Intimal Plaque Formation in Hypercholesterolemia, 107

Dose response
n-3 Fatty Acids and Leukocyte Chemotaxis: Effects in Hyperlipidemia and Dose–Response Studies in Healthy Men, 429

Drug administration schedule
Comparison Between Morning and Evening Doses of Simvastatin in Hyperlipidemic Subjects: A Double-Blind Comparative Study, 816

Duff lecture
Multifactorial Etiology of Hypercholesterolemia: Implications for Prevention of Coronary Heart Disease, 1619

Dysfibrinogenemia
A Role for Platelets and Thrombin in the Juvenile Stroke of Two Siblings With Defective Thrombin-Adsorbing Capacity of Fibrin(ogen), 785

E

Editorial pg. 1

Eicosanoids
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Eicosapentaenoic acid
Atherosclerosis: Chronic Effects of Fish Oil and a Therapeutic Diet in Nonhuman Primates, 719
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457

Elastin
Interaction of Low Density Lipoproteins With Human Aortic Elastin, 116

Electron microscopy
Inhibitors of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Induce Reductase Accumulation and Altered Lamellar Bodies in Rat Forestomach Keratinocytes, 1156

Endothelial cell–β-very low density lipoproteins
Oxidation of β-Very Low Density Lipoprotein by Endothelial Cells Enhances Its Metabolism by Smooth Muscle Cells in Culture, 279

Endothelial cells
Alterations in Human Vascular Endothelial Cell Function by Oxygen Free Radicals: Platelet Adherence and Prostacyclin Release, 594
Effects of Tumor Necrosis Factor on Prostacyclin Production and the Barrier Function of Human Endothelial Cell Monolayers, 872
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663
Local Modulation of Intracellular Calcium Levels Near a Single-Cell Wound in Human Endothelial Monolayers, 1258
Modulation of Extracellular Matrix Proteins by Endothelial Cells Undergoing Angiogenesis In Vitro, 805
Native Low Density Lipoprotein: Endothelial Cell Recruitment of Mononuclear Cells, 1175
Oxidation of β-Very Low Density Lipoprotein by Endothelial Cells Enhances Its Metabolism by Smooth Muscle Cells in Culture, 279
Passage State Affects Arachidonic Acid Content and Eicosanoid Release in Porcine Aortic Endothelial Cells, 167
Platelet Adhesion to Exposed Endothelial Cell Extracellular Matrixes Is Influenced by the Method of Preparation, 436
Reduction of Endothelial Microfilament Bundles in the Low-Shear Region of the Canine Aorta: Association With Intimal Plaque Formation in Hypercholesterolemia, 107
Stimulating Effect of Oxidized Low Density Lipoproteins on Plasminogen Activator Inhibitor–1 Synthesis by Endothelial Cells, 1821
Toxicity of Oxygenated Cholesterol Derivatives Toward Cultured Human Umbilical Vein Endothelial Cells, 423

Endothelial injury
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517
Reduction in Thrombus Formation by PG-1 $F(ab')_2$, an Anti–Guinea Pig Platelet Glycoprotein Ib Monoclonal Antibody, 1231

Endothelium
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530
Dynamics of Shear-Induced Redistribution of F-Actin in Endothelial Cells In Vivo, 1814
Hemin: A Possible Physiological Mediator of Low Density Lipoprotein Oxidation and Endothelial Injury, 1700
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254
The Endothelium of Advanced Arteriosclerotic Plaques in Humans, 1678

Endothelium-dependent vasodilation
Effects of Native and Oxidized Low Density Lipoproteins on Formation and Inactivation of Endothelium-Derived Relaxing Factor, 198

Endothelium-derived relaxing factor
Changes in Vasoconstrictor and Vasodilator Responses of the Basilar Artery During Maturation in the Watanabe Heritable Hyperlipidemic Rabbit Differ From Those in the New Zealand White Rabbit, 1147

Enzyme-linked immunosorbent assay
Lipoprotein(a) and Apolipoprotein(a) in a New World Monkey, the Common Marmoset *(Callithrix jacchus):* Association of Variable Plasma Lipoprotein(a) Levels With a Single Apolipoprotein(a) Isoform, 1030

Epidemiology
Cardiovascular Disease and Arterial Calcification in Insulin-Dependent Diabetes Mellitus: Interrelations and Risk Factor Profiles: Pittsburgh Epidemiology of Diabetes Complications Study-V, 958
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130
Risk Factors for Early Carotid Atherosclerosis in Middle-Aged French Women, 966

Epidermal growth factor
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660

Epinephrine
Effect of Aspirin and Epinephrine on Experimentally Induced Thrombogenesis in Dogs: A Parallelism Between In Vivo and Ex Vivo Thrombosis Models, 1182

Erratum
Okadaic Acid Blocks Lipoprotein-Medicated Cholesteral Transport and Steroidogenesis in Adrenocortical Cells, 1853

Esterases
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663

Exercise
Dissociation Between Postprandial Lipemia and High Density Lipoprotein Cholesterol Concentrations in Endurance-Trained Men, 838

Exercise effects
Effects of Exercise Training on Cardiovascular Function and Plasma Lipid, Lipoprotein, and Apolipoprotein Concentrations in Premenopausal and Postmenopausal Women, 912

Experimental atherosclerosis
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745

Extracellular matrix
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Modulation of Extracellular Matrix Proteins by Endothelial Cells Undergoing Angiogenesis In Vitro, 805
Platelet Adhesion to Exposed Endothelial Cell Extracellular Matrixes Is Influenced by the Method of Preparation, 436

Extrinsic pathway inhibitor
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

F

Factor VII
A Common Genetic Polymorphism Associated With Lower Coagulation Factor VII Levels in Healthy Individuals, 540
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

Familial defective apolipoprotein B
Apolipoprotein B Gene Mutations in Austrian Subjects With Heart Disease and Their Kindred, 371

Familial defective apolipoprotein B-100
Clinical Signs of Familial Hypercholesterolemia in Patients With Familial Defective Apolipoprotein B-100 and Normal Low Density Lipoprotein Receptor Function, 691

Familial hypercholesterolemia
Characterization of Three Mutations of the Low Density Lipoprotein Receptor Gene in Italian Patients With Familial Hypercholesterolemia, 234
Clinical Signs of Familial Hypercholesterolemia in Patients With Familial Defective Apolipoprotein B-100 and Normal Low Density Lipoprotein Receptor Function, 691
Effects of n-3 and n-6 Fatty Acid–Enriched Diets on Plasma Lipoproteins and Apolipoproteins in Heterozygous Familial Hypercholesterolemia, 47
Genetic and Environmental Factors Affecting the Incidence of Coronary Artery Disease in Heterozygous Familial Hypercholesterolemia, 290
Low Density Lipoprotein Kinetics in a Family Having Defective Low Density Lipoprotein Receptors in Which Hypercholesterolemia Is Suppressed, 578
Platelet Function in Watanabe Heritable Hyperlipidemic Rabbits: Decreased Sensitivity to Thromboxane A_2, 610
Serum Lipoprotein(a) in Patients Heterozygous for Familial Hypercholesterolemia, Their Relatives, and Unrelated Control Populations, 940
Serum Low Density Lipoprotein Cholesterol Level and Cholesterol Absorption Efficiency Are Influenced by Apolipoprotein B and E Polymorphism and by the F Helsinki Mutation of the Low Density Lipoprotein Receptor Gene in Familial Hypercholesterolemia, 1368
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138
Type III Dyslipoproteinemia in Patients Heterozygous for Familial Hypercholesterolemia and Apolipoprotein E2: Evidence for a Gene–Gene Interaction, 1137

Fat infusion
Metabolism of Lipoprotein Remnants in Humans: Studies During Intestinal Infusion of Fat and Cholesterol in Subjects With Varying Expression of the Low Density Lipoprotein Receptor, 827

Fat tolerance test
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Fatty acid synthesis
Effect of Interleukin-1 on Lipid Metabolism in the Rat: Similarities to and Differences From Tumor Necrosis Factor, 495

Fatty acids
Enhanced Susceptibility to In Vitro Oxidation of the Dense Low Density Lipoprotein Subfraction in Healthy Subjects, 298

Fatty streaks
Use of Serum Lipid and Apolipoprotein Concentrations to Predict Extent of Diet-Induced Atherosclerotic Lesions in Aortas and Coronary Arteries and to Demonstrate Regression of Lesions in Individual Rhesus Monkeys, 467

Female
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Fibrin
Both Circulating and Clot-Bound Plasminogen Activator Inhibitor–1 Inhibit Endogenous Fibrinolysis in the Rat, 1276

Fibrin deposition
Quantification of Fibrin Deposition in Flowing Blood With Peroxidase-Labeled Fibrinogen: High Shear Rates Induce Decreased Fibrin Deposition and Appearance of Fibrin Monomers, 211

Fibrin monomers
Quantification of Fibrin Deposition in Flowing Blood With Peroxidase-Labeled Fibrinogen: High Shear Rates Induce Decreased Fibrin Deposition and Appearance of Fibrin Monomers, 211

Fibrin surface
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

Fibrinogen
Inhibition of Platelet Retention on Artificial Microvascular Grafts With Monoclonal Antibodies and a High-Affinity Peptide Directed Against Platelet Membrane Glycoproteins, 552
Plasma Fibrinogen and Ischemic Heart Disease Risk Factors, 344
Thrombin-Induced Platelet Aggregates Have a Dynamic Structure: Time-Dependent Redistribution of Glycoprotein IIb–IIIa Complexes and Secreted Adhesive Proteins, 704

Fibrinolysis
Both Circulating and Clot-Bound Plasminogen Activator Inhibitor–1 Inhibit Endogenous Fibrinolysis in the Rat, 1276
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183
Transient Increase of Plasma Lipoprotein(a) in Patients With Unstable Angina Pectoris: Does Lipoprotein(a) Alter Fibrinolysis?, 1772

Fibroblasts
Display of Low Density Lipoprotein Receptors Is Clustered, Not Dispersed, in Fibroblast and Hepatocyte Plasma Membranes, 261
High Density Lipoprotein Apolipoproteins Mediate Removal of Sterol From Intracellular Pools but Not From Plasma Membranes of Cholesterol-Loaded Fibroblasts, 403

Fibronectin
Modulation of Extracellular Matrix Proteins by Endothelial Cells Undergoing Angiogenesis In Vitro, 805

Fish oils
Dose Response of Dietary Fish Oil Supplementations on Platelet Adhesion, 39
Effects of n-3 and n-6 Fatty Acid–Enriched Diets on Plasma Lipoproteins and Apolipoproteins in Heterozygous Familial Hypercholesterolemia, 47
Fish Oil Supplementation Reduces β–Very Low Density Lipoprotein in Type III Dysbetalipoproteinemia, 864
n-3 Fatty Acids and Leukocyte Chemotaxis: Effects in Hyperlipidemia and Dose–Response Studies in Healthy Men, 429
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Flow patterns
The Endothelium of Advanced Arteriosclerotic Plaques in Humans, 1678

Flow-mediated vasoconstriction
Enhanced Constriction of the Peripheral Large Artery in Response to Acute Induction of a Low-Flow State in Human Hypercholesterolemia, 161

Foam cell formation
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316
Enhanced Uptake and Impaired Intracellular Metabolism of Low Density Lipoprotein Complexed With Anti–Low Density Lipoprotein Antibodies, 1356

Foam cells
Overexpression of Low Density Lipoprotein Receptor on Chinese Hamster Ovary Cells Generates Foam Cells, 1310

Fractional catabolic rate
Probucol Decreases Apolipoprotein A-I Transport Rate and Increases High Density Lipoprotein Cholesteryl Ester Fractional Catabolic Rate in Control and Human Apolipoprotein A-I Transgenic Mice, 1295

Freeze-etch
Lipid Accumulation in Rabbit Aortic Intima 2 Hours After Bolus Infusion of Low Density Lipoprotein: A Deep-Etch and Immunolocalization Study of Ultrarapidly Frozen Tissue, 1795

Freeze-fracture
Lipid Accumulation in Rabbit Aortic Intima 2 Hours After Bolus Infusion of Low Density Lipoprotein: A Deep-Etch and Immunolocalization Study of Ultrarapidly Frozen Tissue, 1795

G

Galactose receptor
Enhanced Hepatic Uptake and Processing of Cholesterol Esters From Low Density Lipoprotein by Specific Lactosaminated Fab Fragments, 1806

Gender differences
Effects of Polymorphisms in Apolipoproteins E, A-IV, and H on Quantitative Traits Related to Risk for Cardiovascular Disease, 1330

Gene regulation
Variable Effects of Different Corticosteroids on Plasma Lipids, Apolipoproteins, and Hepatic Apolipoprotein mRNA Levels in Rats, 760

Genetic disorders
Apolipoprotein B Gene Mutations in Austrian Subjects With Heart Disease and Their Kindred, 371

Genetic polymorphisms
A Common Genetic Polymorphism Associated With Lower Coagulation Factor VII Levels in Healthy Individuals, 540

Genetic variation
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183

Genetics
Genetic and Environmental Contributions to Cholesterol and Its Subfractions in 11-Year-Old Twins: The Medical College of Virginia Twin Study, 844
Prevalence of Familial Hyperhomocyst(e)inemia in Men With Premature Coronary Artery Disease, 1129
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Glucose
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077

Glycoprotein IIb–IIIa complexes
Thrombin-Induced Platelet Aggregates Have a Dynamic Structure: Time-Dependent Redistribution of Glycoprotein IIb–IIIa Complexes and Secreted Adhesive Proteins, 704

Glycoproteins
Inhibition of Platelet Retention on Artificial Microvascular Grafts With Monoclonal Antibodies and a High-Affinity Peptide Directed Against Platelet Membrane Glycoproteins, 552

Glycosaminoglycans
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191
Specificity of the Low Density Lipoprotein–Glycosaminoglycan Interaction, 561

Gold labeling techniques
Display of Low Density Lipoprotein Receptors Is Clustered, Not Dispersed, in Fibroblast and Hepatocyte Plasma Membranes, 261

Golgi abnormalities
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

Gradient gel electrophoresis
High Density Lipoproteins and Coronary Atherosclerosis: A Strong Inverse Relation With The Largest Particles Is Confined to Normotriglyceridemic Patients, 174

Growth factors
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660

Growth inhibitors
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Growth substances
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Guar gum
Guar Gum and Plasma Cholesterol: Effect of Guar Gum and an Oat Fiber Source on Plasma Lipoproteins and Cholesterol in Hypercholesterolemic Adults, 1204

Guinea pigs
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191

H

Health
Influences of Common Variants of Apolipoprotein E on Measures of Lipid Metabolism in a Sample Selected for Health, 1100

HeLa cells
Interaction of LpB, LpB:E, LpB:C-III, and LpB:C-III:E Lipoproteins With the Low Density Lipoprotein Receptor of HeLa Cells, 1021

Hemin
Hemin: A Possible Physiological Mediator of Low Density Lipoprotein Oxidation and Endothelial Injury, 1700

Hemodynamics
Dynamics of Shear-Induced Redistribution of F-Actin in Endothelial Cells In Vivo, 1814

Hemorheology
Differential Accumulation of Intimal Monocyte–Macrophages Relative to Lipoproteins and Lipofuscin Corresponds to Hemodynamic Forces on Cardiac Valves in Mice, 947

Heparan sulfate
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530
Metabolism and Turnover of Cell Surface–Associated Heparan Sulfate Proteoglycan and Chondroitin Sulfate Proteoglycan in Normal and Cholesterol-Enriched Macrophages, 1752

Hepatic apoprotein A-I mRNA
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apoprotein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719

Hepatic lipase
Hepatic Lipase Promotes a Loss of Apolipoprotein A-I From Triglyceride-Enriched Human High Density Lipoproteins During Incubation In Vitro, 415
Increased Removal of β–Very Low Density Lipoproteins After Ethinyl Estradiol Is Associated With Increased mRNA Levels for Hepatic Lipase, Lipoprotein Lipase, and the Low Density Lipoprotein Receptor in Watanabe Heritable Hyperlipidemic Rabbits, 1652

Hepatocytes
Display of Low Density Lipoprotein Receptors Is Clustered, Not Dispersed, in Fibroblast and Hepatocyte Plasma Membranes, 261

High density lipoprotein apolipoproteins
High Density Lipoprotein Apolipoproteins Mediate Removal of Sterol From Intracellular Pools but Not From Plasma Membranes of Cholesterol-Loaded Fibroblasts, 403

High density lipoprotein cholesterol
Endogenous Sex Hormones, High Density Lipoprotein Cholesterol, and Other Lipoprotein Fractions in Men, 489
Relation of Fasting Plasma Insulin Concentration to High Density Lipoprotein Cholesterol and Triglyceride Concentrations in Men, 1636
Relation of Serum Testosterone Levels to High Density Lipoprotein Cholesterol and Other Characteristics in Men, 307

High density lipoproteins
Age and Dietary Polyunsaturated Fat Alter High Density Lipoprotein Subfraction Cholesterol Concentrations in a Pediatric Population of African Green Monkeys, 617
Characterization of a Human High Density Lipoprotein–Associated Protein, NA1/NA2: Identity With SP-40,40, an Inhibitor of Complement-Mediated Cytolysis, 645
Cholesterol Esterification Rates in Very Low Density Lipoprotein– and Low Density Lipoprotein–Depleted Plasma: Relation to High Density Lipoprotein Subspecies, Sex, Hyperlipidemia, and Coronary Artery Disease, 64
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71
Dissociation Between Postprandial Lipemia and High Density Lipoprotein Cholesterol Concentrations in Endurance-Trained Men, 838
Effect of Corn and Coconut Oil–Containing Diets With and Without Cholesterol on High Density Lipoprotein Apoprotein A-I Metabolism and Hepatic Apoprotein A-I mRNA Levels in Cebus Monkeys, 1719
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23
Hepatic Lipase Promotes a Loss of Apolipoprotein A-I From Triglyceride-Enriched Human High Density Lipoproteins During Incubation In Vitro, 415
High Density Lipoproteins and Coronary Atherosclerosis: A Strong Inverse Relation With The Largest Particles Is Confined to Normotriglyceridemic Patients, 174
Increase in Plasma Cholesteryl Ester Transfer Protein During Probucol Treatment: Relation to Changes in High Density Lipoprotein Composition, 476
Native Low Density Lipoprotein: Endothelial Cell Recruitment of Mononuclear Cells, 1175
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55
Plasma Concentrations of Cholesteryl Ester Transfer Protein in Hyperlipoproteinemia: Relation to Cholesteryl Ester Transfer Protein Activity and Other Lipoprotein Variables, 797
Probucol Decreases Apolipoprotein A-I Transport Rate and Increases High Density Lipoprotein Cholesteryl Ester Fractional Catabolic Rate in Control and Human Apolipoprotein A-I Transgenic Mice, 1295

Hispanics
The Role of Insulin and Body Fat in Associations of Physical Activity With Lipids and Lipoproteins in a Biethnic Population: The San Luis Valley Diabetes Study, 973

Histidine
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322

Histocompatibility antigens
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745

HL-60 cells
Lipoprotein Receptors of HL-60 Macrophages: Effect of Differentiation With Tetramyristic Phorbol Acetate and 1,25-Dihydroxyvitamin D_3, 995

HMG-CoA reductase inhibitor
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

Homocyst(e)ine
Prevalence of Familial Hyperhomocyst(e)inemia in Men With Premature Coronary Artery Disease, 1129

Homocysteine thiolactone
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663

Homocystinuria
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663

Human aorta
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316

Human atherosclerosis
Dietary Eicosapentaenoic Acid and Docosahexaenoic Acid From Fish Oil: Their Incorporation Into Advanced Human Atherosclerotic Plaques, 903

Human cell division
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Human endothelial cells
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042

3-Hydroxy-3-methylglutaryl coenzyme A reductase inhibitors
Inhibitors of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Induce Reductase Accumulation and Altered Lamellar Bodies in Rat Forestomach Keratinocytes, 1156

Hyperalphalipoproteinemia
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71

Hypercholesterolemia
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191
Effects of Native and Oxidized Low Density Lipoproteins on Formation and Inactivation of Endothelium-Derived Relaxing Factor, 198
Enhanced Constriction of the Peripheral Large Artery in Response to Acute Induction of a Low-Flow State in Human Hypercholesterolemia, 161
Enhanced Hepatic Uptake and Processing of Cholesterol Esters From Low Density Lipoprotein by Specific Lactosaminated Fab Fragments, 1806

High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745
Leukocytosis in Rabbits With Diet-Induced Atherosclerosis, 985
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639
Mechanisms of Hypertriglyceridemia in the Coconut Oil/Cholesterol-Fed Rabbit: Increased Secretion and Decreased Catabolism of Very Low Density Lipoprotein, 918
Multifactorial Etiology of Hypercholesterolemia: Implications for Prevention of Coronary Heart Disease, 1619
Overproduction of a Buoyant Low Density Lipoprotein Subspecies in Spontaneously Hypercholesterolemic Mutant Pigs, 351

Hyperglycemia
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517

Hyperlipidemia
Apolipoprotein E Polymorphism Association With Lipoprotein Profile in Endogenous Hypertriglyceridemia and Familial Hypercholesterolemia, 272
Cholesterol Esterification Rates in Very Low Density Lipoprotein– and Low Density Lipoprotein–Depleted Plasma: Relation to High Density Lipoprotein Subspecies, Sex, Hyperlipidemia, and Coronary Artery Disease, 64
Comparison Between Morning and Evening Doses of Simvastatin in Hyperlipidemic Subjects: A Double-Blind Comparative Study, 816
Fish Oil Supplementation Reduces β–Very Low Density Lipoprotein in Type III Dysbetalipoproteinemia, 864
n-3 Fatty Acids and Leukocyte Chemotaxis: Effects in Hyperlipidemia and Dose–Response Studies in Healthy Men, 429
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395
Variable Effects of Different Corticosteroids on Plasma Lipids, Apolipoproteins, and Hepatic Apolipoprotein mRNA Levels in Rats, 760

Hyperlipoproteinemia
Plasma Concentrations of Cholesteryl Ester Transfer Protein in Hyperlipoproteinemia: Relation to Cholesteryl Ester Transfer Protein Activity and Other Lipoprotein Variables, 797

Hypertension
Genetic and Environmental Factors Affecting the Incidence of Coronary Artery Disease in Heterozygous Familial Hypercholesterolemia, 290
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Reduction of Transmural ^{125}I-Albumin Concentration in Rat Aortic Media by Chronic Hypertension, 334

Hyperthyroidism
Aortic Intimal Thickening and Myosin Isoform Expression in Hyperthyroid Rabbits, 1376

Hypertriglyceridemia
Hypolipidemic Effect of β, β′-Tetramethyl Hexadecanedioic Acid (MEDICA 16) in Hyperlipidemic JCR:LA-Corpulent Rats, 602
Interaction Between Variant Apolipoproteins C-II and E That Affects Plasma Lipoprotein Concentrations, 1303

Hypertriglyceridemic very low density lipoproteins
Cholesterol Accumulation in J774 Macrophages Induced by Triglyceride-Rich Lipoproteins: Comparison of Very Low Density Lipoprotein From Subjects With Type III, IV, and V Hyperlipoproteinemias, 221

I

Immune complexes
Enhanced Uptake and Impaired Intracellular Metabolism of Low Density Lipoprotein Complexed With Anti–Low Density Lipoprotein Antibodies, 1356

Immune response
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Immunoaffinity
Interaction of LpB, LpB:E, LpB:C-III, and LpB:C-III:E Lipoproteins With the Low Density Lipoprotein Receptor of HeLa Cells, 1021

Immunoblotting
Lipoprotein(a) and Apolipoprotein(a) in a New World Monkey, the Common Marmoset *(Callithrix jacchus):* Association of Variable Plasma Lipoprotein(a) Levels With a Single Apolipoprotein(a) Isoform, 1030

Immunofluorescence
Activation of Calpain I and Hydrolysis of Calpain Substrates (Actin-Binding Protein, Glycoprotein Ib, and Talin) Are Not a Function of Thrombin-Induced Platelet Aggregation, 882

Immunoglobulin G
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316

Immunolocalization
Lipid Accumulation in Rabbit Aortic Intima 2 Hours After Bolus Infusion of Low Density Lipoprotein: A Deep-Etch and Immunolocalization Study of Ultrarapidly Frozen Tissue, 1795

Immunological mechanisms of arteriosclerosis
Enhanced Uptake and Impaired Intracellular Metabolism of Low Density Lipoprotein Complexed With Anti–Low Density Lipoprotein Antibodies, 1356

In situ hybridization
Expression of Lipoprotein Lipase mRNA in Rat Heart Is Localized Mainly to Mesenchymal Cells as Studied by In Situ Hybridization, 857

Indo-1
Local Modulation of Intracellular Calcium Levels Near a Single-Cell Wound in Human Endothelial Monolayers, 1258

Infection
Chlamydia pneumoniae Strain *TWAR* Antibody and Angiographically Demonstrated Coronary Artery Disease, 547

Inflammation
Atherosclerosis: Chronic Effects of Fish Oil and a Therapeutic Diet in Nonhuman Primates, 719
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Injury
Local Modulation of Intracellular Calcium Levels Near a Single-Cell Wound in Human Endothelial Monolayers, 1258

Insulin
Asymptomatic Atherosclerosis and Insulin Resistance, 1068
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91
Lipoprotein Lipase Activity in Skeletal Muscle Is Related to Insulin Sensitivity, 1192
The Role of Insulin and Body Fat in Associations of Physical Activity With Lipids and Lipoproteins in a Biethnic Population: The San Luis Valley Diabetes Study, 973

Insulin resistance
Asymptomatic Atherosclerosis and Insulin Resistance, 1068

Insulin sensitivity
Lipoprotein Lipase Activity in Skeletal Muscle Is Related to Insulin Sensitivity, 1192

Insulin-dependent diabetes mellitus
Cardiovascular Disease and Arterial Calcification in Insulin-Dependent Diabetes Mellitus: Interrelations and Risk Factor Profiles: Pittsburgh Epidemiology of Diabetes Complications Study-V, 958

Interactions
Specificity of the Low Density Lipoprotein–Glycosaminoglycan Interaction, 561

Interferon γ
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223

Interleukin-1
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Effect of Interleukin-1 on Lipid Metabolism in the Rat: Similarities to and Differences From Tumor Necrosis Factor, 495
Expression of Monocyte Chemotactic Protein and Interleukin-8 by Cytokine-Activated Human Vascular Smooth Muscle Cells, 1166

Intermediate density lipoproteins
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71
Quantitative Studies of Transfer In Vivo of Low Density, Sf 12–60, and Sf 60–400 Lipoproteins Between Plasma and Arterial Intima in Humans, 569

Interstitial collagen
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223

Intima
Lipid Accumulation in Rabbit Aortic Intima 2 Hours After Bolus Infusion of Low Density Lipoprotein: A Deep-Etch and Immunolocalization Study of Ultrarapidly Frozen Tissue, 1795

Intimal thickening
Aortic Intimal Thickening and Myosin Isoform Expression in Hyperthyroid Rabbits, 1376
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517
Shear Stress Regulates Smooth Muscle Proliferation and Neointimal Thickening in Porous Polytetrafluoroethylene Grafts, 1844

Intravital microscopy
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154

Ischemic heart disease
A Common Genetic Polymorphism Associated With Lower Coagulation Factor VII Levels in Healthy Individuals, 540

Ischemic heart disease
Plasma Fibrinogen and Ischemic Heart Disease Risk Factors, 344

Isoforms
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237

Italian familial hypercholesterolemic patients
Characterization of Three Mutations of the Low Density Lipoprotein Receptor Gene in Italian Patients With Familial Hypercholesterolemia, 234

J

JCR:LA corpulent rat
Hypolipidemic Effect of β, β′-Tetramethyl Hexadecanedioic Acid (MEDICA 16) in Hyperlipidemic JCR::LA-Corpulent Rats, 602

K

Keratinocyte hyperproliferation
Inhibitors of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Induce Reductase Accumulation and Altered Lamellar Bodies in Rat Forestomach Keratinocytes, 1156

Kringle domains
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

L

Lard
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778

Large-artery diameter
Enhanced Constriction of the Peripheral Large Artery in Response to Acute Induction of a Low-Flow State in Human Hypercholesterolemia, 161

Laser injury
Reduction in Thrombus Formation by PG-1 $F(ab')_2$, an Anti–Guinea Pig Platelet Glycoprotein Ib Monoclonal Antibody, 1231

Lecithin:cholesterol acyltransferase
Cholesterol Esterification Rates in Very Low Density Lipoprotein– and Low Density Lipoprotein–Depleted Plasma: Relation to High Density Lipoprotein Subspecies, Sex, Hyperlipidemia, and Coronary Artery Disease, 64
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55

Lecithin:cholesteryl acyltransferase
The Mutation Causing the Common Apolipoprotein A-IV Polymorphism Is a Glutamine to Histidine Substitution of Amino Acid 360, 851

Leukocytosis
Leukocytosis in Rabbits With Diet-Induced Atherosclerosis, 985

Linkage analysis
Effects of Three Genetic Loci in a Pedigree With Multiple Lipoprotein Phenotypes, 1349

Lipid autacoids
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Lipid droplets
Phagocytosis of Lipase-Aggregated Low Density Lipoprotein Promotes Macrophage Foam Cell Formation: Sequential Morphological and Biochemical Events, 1643

Lipid modulation
Comparison of CI-976, an ACAT Inhibitor, and Selected Lipid-Lowering Agents for Antiatherosclerotic Activity in Iliac–Femoral and Thoracic Aortic Lesions: A Biochemical, Morphological, and Morphometric Evaluation, 1830

Lipid peroxidation
Enhanced Susceptibility to In Vitro Oxidation of the Dense Low Density Lipoprotein Subfraction in Healthy Subjects, 298

Lipid peroxides
Varying Susceptibility of Different Low Density Lipoproteins to Oxidative Modification, 482

Lipid transfer
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55

Lipids
Endogenous Sex Hormones, High Density Lipoprotein Cholesterol, and Other Lipoprotein Fractions in Men, 489
Influences of Common Variants of Apolipoprotein E on Measures of Lipid Metabolism in a Sample Selected for Health, 1100
Lipoprotein Lipase Activity in Skeletal Muscle Is Related to Insulin Sensitivity, 1192
Plasma Triglyceride and Coronary Heart Disease, 2
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395
The Role of Insulin and Body Fat in Associations of Physical Activity With Lipids and Lipoproteins in a Biethnic Population: The San Luis Valley Diabetes Study, 973

Lipofuscin/ceroid
Differential Accumulation of Intimal Monocyte–Macrophages Relative to Lipoproteins and Lipofuscin Corresponds to Hemodynamic Forces on Cardiac Valves in Mice, 947

Lipogenesis
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91

Lipoprotein cholesterol
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237
Genetic and Environmental Contributions to Cholesterol and Its Subfractions in 11-Year-Old Twins: The Medical College of Virginia Twin Study, 844

Lipoprotein interaction
Quantitative Studies of Transfer In Vivo of Low Density, Sf 12–60, and Sf 60–400 Lipoproteins Between Plasma and Arterial Intima in Humans, 569

Lipoprotein kinetics
Low Density Lipoprotein Kinetics in a Family Having Defective Low Density Lipoprotein Receptors in Which Hypercholesterolemia Is Suppressed, 578

Lipoprotein lipase
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23
Effects of Human Recombinant Macrophage Colony–Stimulating Factor on the Secretion of Lipoprotein Lipase From Macrophages, 1315
Increased Removal of β–Very Low Density Lipoproteins After Ethinyl Estradiol Is Associated With Increased mRNA Levels for Hepatic Lipase, Lipoprotein Lipase, and the Low Density Lipoprotein Receptor in Watanabe Heritable Hyperlipidemic Rabbits, 1652

Lipoprotein lipase activity
Expression of Lipoprotein Lipase mRNA in Rat Heart Is Localized Mainly to Mesenchymal Cells as Studied by In Situ Hybridization, 857
Lipoprotein Lipase Activity in Skeletal Muscle Is Related to Insulin Sensitivity, 1192

Lipoprotein lipase mRNA
Expression of Lipoprotein Lipase mRNA in Rat Heart Is Localized Mainly to Mesenchymal Cells as Studied by In Situ Hybridization, 857

Lipoprotein modification
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316

Lipoprotein(a)
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629
Lipoprotein(a) in Diet-Induced Atherosclerosis in Nonhuman Primates, 32
Serum Lipoprotein(a) in Patients Heterozygous for Familial Hypercholesterolemia, Their Relatives, and Unrelated Control Populations, 940
Transient Increase of Plasma Lipoprotein(a) in Patients With Unstable Angina Pectoris: Does Lipoprotein(a) Alter Fibrinolysis?, 1772

Lipoproteins
Apolipoprotein B Gene Mutations in Austrian Subjects With Heart Disease and Their Kindred, 371
Apolipoprotein E Polymorphism Association With Lipoprotein Profile in Endogenous Hypertriglyceridemia and Familial Hypercholesterolemia, 272
Characterization of a Human High Density Lipoprotein–Associated Protein, NA1/NA2: Identity With SP-40,40, an Inhibitor of Complement-Mediated Cytolysis, 645
Cholesterol-Raising Factor From Boiled Coffee Does Not Pass a Paper Filter, 586
Differential Accumulation of Intimal Monocyte–Macrophages Relative to Lipoproteins and Lipofuscin Corresponds to Hemodynamic Forces on Cardiac Valves in Mice, 947
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23
Effects of n-3 and n-6 Fatty Acid–Enriched Diets on Plasma Lipoproteins and Apolipoproteins in Heterozygous Familial Hypercholesterolemia, 47
Effects of the Apolipoprotein E Polymorphism on Levels of Lipids, Lipoproteins, and Apolipoproteins Among Mexican-Americans in Starr County, Texas, 362
Fish Oil Supplementation Reduces β–Very Low Density Lipoprotein in Type III Dysbetalipoproteinemia, 864
Guar Gum and Plasma Cholesterol: Effect of Guar Gum and an Oat Fiber Source on Plasma Lipoproteins and Cholesterol in Hypercholesterolemic Adults, 1204
Influences of Common Variants of Apolipoprotein E on Measures of Lipid Metabolism in a Sample Selected for Health, 1100
Interaction of LpB, LpB:E, LpB:C-III, and LpB:C-III:E Lipoproteins With the Low Density Lipoprotein Receptor of HeLa Cells, 1021
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123
Mechanisms of Hypertriglyceridemia in the Coconut Oil/Cholesterol-Fed Rabbit: Increased Secretion and Decreased Catabolism of Very Low Density Lipoprotein, 918
Plasma Concentrations of Cholesteryl Ester Transfer Protein in Hyperlipoproteinemia: Relation to Cholesteryl Ester Transfer Protein Activity and Other Lipoprotein Variables, 797
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

Logistic regression
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Lovastatin
Inhibitors of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Induce Reductase Accumulation and Altered Lamellar Bodies in Rat Forestomach Keratinocytes, 1156
Vastatins Inhibit Cholesterol Ester Accumulation in Human Monocyte-Derived Macrophages, 146

Low density lipoprotein
Interaction of Low Density Lipoproteins With Human Aortic Elastin, 116
Overproduction of a Buoyant Low Density Lipoprotein Subspecies in Spontaneously Hypercholesterolemic Mutant Pigs, 351
Specificity of the Low Density Lipoprotein–Glycosaminoglycan Interaction, 561
Stimulating Effect of Oxidized Low Density Lipoproteins on Plasminogen Activator Inhibitor–1 Synthesis by Endothelial Cells, 1821

Low density lipoprotein cholesterol
Variation in the Low Density Lipoprotein Receptor Gene Is Associated With Differences in Plasma Low Density Lipoprotein Cholesterol Levels in Young and Old Normal Individuals From Italy, 509
Serum Low Density Lipoprotein Cholesterol Level and Cholesterol Absorption Efficiency Are Influenced by Apolipoprotein B and E Polymorphism and by the F Helsinki Mutation of the Low Density Lipoprotein Receptor Gene in Familial Hypercholesterolemia, 1368

Low density lipoprotein immune complexes
Enhanced Uptake and Impaired Intracellular Metabolism of Low Density Lipoprotein Complexed With Anti–Low Density Lipoprotein Antibodies, 1356

Low density lipoprotein particle size
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077

Low density lipoprotein receptor
Increased Removal of β–Very Low Density Lipoproteins After Ethinyl Estradiol Is Associated With Increased mRNA Levels for Hepatic Lipase, Lipoprotein Lipase, and the Low Density Lipoprotein Receptor in Watanabe Heritable Hyperlipidemic Rabbits, 1652
Interaction of LpB, LpB:E, LpB:C-III, and LpB:C-III:E Lipoproteins With the Low Density Lipoprotein Receptor of HeLa Cells, 1021
Overexpression of Low Density Lipoprotein Receptor on Chinese Hamster Ovary Cells Generates Foam Cells, 1310
Variation in the Low Density Lipoprotein Receptor Gene Is Associated With Differences in Plasma Low Density Lipoprotein Cholesterol Levels in Young and Old Normal Individuals From Italy, 509

Low density lipoprotein receptor defect
Effects of Three Genetic Loci in a Pedigree With Multiple Lipoprotein Phenotypes, 1349

Low density lipoprotein receptor function
Clinical Signs of Familial Hypercholesterolemia in Patients With Familial Defective Apolipoprotein B-100 and Normal Low Density Lipoprotein Receptor Function, 691

Low density lipoprotein receptor gene
Characterization of Three Mutations of the Low Density Lipoprotein Receptor Gene in Italian Patients With Familial Hypercholesterolemia, 234
Serum Low Density Lipoprotein Cholesterol Level and Cholesterol Absorption Efficiency Are Influenced by Apolipoprotein B and E Polymorphism and by the F Helsinki Mutation of the Low Density Lipoprotein Receptor Gene in Familial Hypercholesterolemia, 1368

Low density lipoprotein receptors
Apolipoprotein B Gene Mutations in Austrian Subjects With Heart Disease and Their Kindred, 371
Display of Low Density Lipoprotein Receptors Is Clustered, Not Dispersed, in Fibroblast and Hepatocyte Plasma Membranes, 261
Low Density Lipoprotein Kinetics in a Family Having Defective Low Density Lipoprotein Receptors in Which Hypercholesterolemia Is Suppressed, 578
Metabolism of Lipoprotein Remnants in Humans: Studies During Intestinal Infusion of Fat and Cholesterol in Subjects With Varying Expression of the Low Density Lipoprotein Receptor, 827

Low density lipoprotein subfractions
Enhanced Susceptibility to In Vitro Oxidation of the Dense Low Density Lipoprotein Subfraction in Healthy Subjects, 298

Low density lipoproteins
Apolipoprotein B Gene Mutations in Austrian Subjects With Heart Disease and Their Kindred, 371
Autoantibodies Against Modified Low Density Lipoprotein: Nonlipid Factor of Blood Plasma That Stimulates Foam Cell Formation, 316
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322
Effects of Estrogen and Progesterone on Plasma Lipoproteins and Experimental Atherosclerosis in the Baboon (*Papio* sp.), 23
Hemin: A Possible Physiological Mediator of Low Density Lipoprotein Oxidation and Endothelial Injury, 1700
Lipid Accumulation in Rabbit Aortic Intima 2 Hours After Bolus Infusion of Low Density Lipoprotein: A Deep-Etch and Immunolocalization Study of Ultrarapidly Frozen Tissue, 1795
Native Low Density Lipoprotein: Endothelial Cell Recruitment of Mononuclear Cells, 1175
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55
Quantitative Studies of Transfer In Vivo of Low Density, Sf 12–60, and Sf 60–400 Lipoproteins Between Plasma and Arterial Intima in Humans, 569
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778
Varying Susceptibility of Different Low Density Lipoproteins to Oxidative Modification, 482
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Low dietary cholesterol
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Low saturated fat
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Low-fat diet
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Lysosomal abnormalities
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

M

Macrophage colony–stimulating factor
Effects of Human Recombinant Macrophage Colony–Stimulating Factor on the Secretion of Lipoprotein Lipase From Macrophages, 1315

Macrophages
Comparison of CI-976, an ACAT Inhibitor, and Selected Lipid-Lowering Agents for Antiatherosclerotic Activity in Iliac–Femoral and Thoracic Aortic Lesions: A Biochemical, Morphological, and Morphometric Evaluation, 1830
Effects of Human Recombinant Macrophage Colony–Stimulating Factor on the Secretion of Lipoprotein Lipase From Macrophages, 1315
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745
Lipoprotein Receptors of HL-60 Macrophages: Effect of Differentiation With Tetramyristic Phorbol Acetate and 1,25-Dihydroxyvitamin D_3, 995
Metabolism and Turnover of Cell Surface–Associated Heparan Sulfate Proteoglycan and Chondroitin Sulfate Proteoglycan in Normal and Cholesterol-Enriched Macrophages, 1752
Peritoneal Macrophage Cholesteryl Ester Content as a Function of Plasma Cholesterol in Rats, 1111

Male
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

MEDICA 16
Hypolipidemic Effect of β, β'-Tetramethyl Hexadecanedioic Acid (MEDICA 16) in Hyperlipidemic JCR:LA-Corpulent Rats, 602

Meeting summary
Progression and Regression of Carotid Atherosclerosis in Clinical Trials, 443

Megakaryocytes
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191

Membrane-bounded vacuoles
Phagocytosis of Lipase-Aggregated Low Density Lipoprotein Promotes Macrophage Foam Cell Formation: Sequential Morphological and Biochemical Events, 1643

Men
Endogenous Sex Hormones, High Density Lipoprotein Cholesterol, and Other Lipoprotein Fractions in Men, 489

Menopausal status
Effects of Exercise Training on Cardiovascular Function and Plasma Lipid, Lipoprotein, and Apolipoprotein Concentrations in Premenopausal and Postmenopausal Women, 912
Waist to Hip Ratio in Middle-Aged Women: Associations With Behavioral and Psychosocial Factors and With Changesin Cardiovascular Risk Factors, 1250

Menopause
Effects of the Apolipoprotein E Polymorphism on Levels of Lipids, Lipoproteins, and Apolipoproteins Among Mexican-Americans in Starr County, Texas, 362

Mevastatin
Vastatins Inhibit Cholesterol Ester Accumulation in Human Monocyte-Derived Macrophages, 146

Mexican-Americans
Effects of the Apolipoprotein E Polymorphism on Levels of Lipids, Lipoproteins, and Apolipoproteins Among Mexican-Americans in Starr County, Texas, 362
Lipoprotein and Apolipoprotein Levels Among Mexican-Americans in Starr County, Texas, 123

Microcirculation
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154

Microfilament bundles
Reduction of Endothelial Microfilament Bundles in the Low-Shear Region of the Canine Aorta: Association With Intimal Plaque Formation in Hypercholesterolemia, 107

Microsurgery
Inhibition of Platelet Retention on Artificial Microvascular Grafts With Monoclonal Antibodies and a High-Affinity Peptide Directed Against Platelet Membrane Glycoproteins, 552

Modified low density lipoproteins
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183
Vastatins Inhibit Cholesterol Ester Accumulation in Human Monocyte-Derived Macrophages, 146

Monkeys
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778

Monoclonal antibodies
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745
Lipoprotein(a) and Apolipoprotein(a) in a New World Monkey, the Common Marmoset *(Callithrix jacchus):* Association of Variable Plasma Lipoprotein(a) Levels With a Single Apolipoprotein(a) Isoform, 1030
Probucol Treatment Affects the Cellular Composition but Not Anti–Oxidized Low Density Lipoprotein Immunoreactivity of Plaques From Watanabe Heritable Hyperlipidemic Rabbits, 751
Reduction in Thrombus Formation by PG-1 $F(ab')_2$, an Anti–Guinea Pig Platelet Glycoprotein Ib Monoclonal Antibody, 1231

Monocyte
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254

Monocyte adhesion
Native Low Density Lipoprotein: Endothelial Cell Recruitment of Mononuclear Cells, 1175

Monocyte chemotactic factor
Expression of Monocyte Chemotactic Protein and Interleukin-8 by Cytokine-Activated Human Vascular Smooth Muscle Cells, 1166

Monocyte chemotaxis
n-3 Fatty Acids and Leukocyte Chemotaxis: Effects in Hyperlipidemia and Dose–Response Studies in Healthy Men, 429

Monocyte–macrophages
Differential Accumulation of Intimal Monocyte–Macrophages Relative to Lipoproteins and Lipofuscin Corresponds to Hemodynamic Forces on Cardiac Valves in Mice, 947

Monocytes
Peritoneal Macrophage Cholesteryl Ester Content as a Function of Plasma Cholesterol in Rats, 1111

Morpology
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517

Movement of receptors and ligands
Thrombin-Induced Platelet Aggregates Have a Dynamic Structure: Time-Dependent Redistribution of Glycoprotein IIb–IIIa Complexes and Secreted Adhesive Proteins, 704

Multivesicular bodies
Phagocytosis of Lipase-Aggregated Low Density Lipoprotein Promotes Macrophage Foam Cell Formation: Sequential Morphological and Biochemical Events, 1643

Mutations
The Mutation Causing the Common Apolipoprotein A-IV Polymorphism Is a Glutamine to Histidine Substitution of Amino Acid 360, 851

Myocardial infarction
A Common Genetic Polymorphism Associated With Lower Coagulation Factor VII Levels in Healthy Individuals, 540
Clinical Signs of Familial Hypercholesterolemia in Patients With Familial Defective Apolipoprotein B-100 and Normal Low Density Lipoprotein Receptor Function, 691
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663

Myointimal proliferation
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Myo–endothelial contacts
The Endothelium of Advanced Arteriosclerotic Plaques in Humans, 1678

Myosin
Modulation of Actin Isoform Expression in Cultured Arterial Smooth Muscle Cells by Heparin and Culture Conditions, 244

Myosin isoform expression
Aortic Intimal Thickening and Myosin Isoform Expression in Hyperthyroid Rabbits, 1376

Myosin isoforms
A Nifedipine-Sensitive Smooth Muscle Cell Population Is Present in the Atherosclerotic Rabbit Aorta, 928

N

N-3 fatty acids
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457
n-3 Fatty Acids and Leukocyte Chemotaxis: Effects in Hyperlipidemia and Dose–Response Studies in Healthy Men, 429

N-3 polyunsaturated fatty acids
Dose Response of Dietary Fish Oil Supplementations on Platelet Adhesion, 39

NBD–ceramide
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

Neovascularization
Connective Tissue Proteinases and Inhibitors in Abdominal Aortic Aneurysms: Involvement of the Vasa Vasorum in the Pathogenesis of Aortic Aneurysms, 1667

Neutrophil chemotaxis
n-3 Fatty Acids and Leukocyte Chemotaxis: Effects in Hyperlipidemia and Dose–Response Studies in Healthy Men, 429

Neutrophil gelatinase
Connective Tissue Proteinases and Inhibitors in Abdominal Aortic Aneurysms: Involvement of the Vasa Vasorum in the Pathogenesis of Aortic Aneurysms, 1667

Nifedipine
A Nifedipine-Sensitive Smooth Muscle Cell Population Is Present in the Atherosclerotic Rabbit Aorta, 928

Nitric oxide
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254

Nitroprusside
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154

Nonhuman primates
Age and Dietary Polyunsaturated Fat Alter High Density Lipoprotein Subfraction Cholesterol Concentrations in a Pediatric Population of African Green Monkeys, 617
Lipoprotein(a) in Diet-Induced Atherosclerosis in Nonhuman Primates, 32

Norepinephrine
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154

Normocholesterolemia
Low Density Lipoprotein Kinetics in a Family Having Defective Low Density Lipoprotein Receptors in Which Hypercholesterolemia Is Suppressed, 578

O

Oat fiber
Guar Gum and Plasma Cholesterol: Effect of Guar Gum and an Oat Fiber Source on Plasma Lipoproteins and Cholesterol in Hypercholesterolemic Adults, 1204

Obesity
Central Adipose Distribution Is Related to Coronary Atherosclerosis, 327
High Fasting Plasma Insulin Is an Indicator of Coronary Heart Disease in Non–Insulin-Dependent Diabetic Patients and Nondiabetic Subjects, 80
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730
Hypolipidemic Effect of β, β'-Tetramethyl Hexadecanedioic Acid (MEDICA 16) in Hyperlipidemic JCR::LA-Corpulent Rats, 602
Lipoprotein Lipase Activity in Skeletal Muscle Is Related to Insulin Sensitivity, 1192

Oligogenic interaction
Interaction Between Variant Apolipoproteins C-II and E That Affects Plasma Lipoprotein Concentrations, 1303

Olive oil
Mechanisms of Hypertriglyceridemia in the Coconut Oil/Cholesterol-Fed Rabbit: Increased Secretion and Decreased Catabolism of Very Low Density Lipoprotein, 918
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457

ω-3 fatty acids
Dietary Eicosapentaenoic Acid and Docosahexaenoic Acid From Fish Oil: Their Incorporation Into Advanced Human Atherosclerotic Plaques, 903
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778

Oral fat load
Postprandial Lipoprotein Metabolism in Normolipidemic Men With and Without Coronary Artery Disease, 653

Overexpression
Overexpression of Low Density Lipoprotein Receptor on Chinese Hamster Ovary Cells Generates Foam Cells, 1310

Oxidants
Hemin: A Possible Physiological Mediator of Low Density Lipoprotein Oxidation and Endothelial Injury, 1700

Oxidation
Effects of Copper and Histidine on Oxidative Modification of Low Density Lipoprotein and Its Subsequent Binding to Collagen, 1322
Oxidation of β-Very Low Density Lipoprotein by Endothelial Cells Enhances Its Metabolism by Smooth Muscle Cells in Culture, 279
Stimulating Effect of Oxidized Low Density Lipoproteins on Plasminogen Activator Inhibitor–1 Synthesis by Endothelial Cells, 1821

Oxidized low density lipoproteins
Hypercholesterolemia and Atherosclerosis Change Vascular Reactivity in Rabbits by Different Mechanisms, 1712

Oxygen free radicals
Alterations in Human Vascular Endothelial Cell Function by Oxygen Free Radicals: Platelet Adherence and Prostacyclin Release, 594

Oxygenated sterols
Toxicity of Oxygenated Cholesterol Derivatives Toward Cultured Human Umbilical Vein Endothelial Cells, 423

Oxysterols
Varying Susceptibility of Different Low Density Lipoproteins to Oxidative Modification, 482

P

Passage State
Passage State Affects Arachidonic Acid Content and Eicosanoid Release in Porcine Aortic Endothelial Cells, 167

Pathogenesis
Connective Tissue Proteinases and Inhibitors in Abdominal Aortic Aneurysms: Involvement of the Vasa Vasorum in the Pathogenesis of Aortic Aneurysms, 1667

Pedigree analysis
Effects of Three Genetic Loci in a Pedigree With Multiple Lipoprotein Phenotypes, 1349

Perfusion chamber
Effect of Aspirin and Epinephrine on Experimentally Induced Thrombogenesis in Dogs: A Parallelism Between In Vivo and Ex Vivo Thrombosis Models, 1182

Peripheral circulation
Vascular Responses to Platelet Activation in Normal and Atherosclerotic Primates In Vivo, 1745

Permeability
Effects of Tumor Necrosis Factor on Prostacyclin Production and the Barrier Function of Human Endothelial Cell Monolayers, 872

Permeabilization
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Phospholipase C
Phagocytosis of Lipase-Aggregated Low Density Lipoprotein Promotes Macrophage Foam Cell Formation: Sequential Morphological and Biochemical Events, 1643

Phospholipid metabolism
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

Physical activity
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077
The Role of Insulin and Body Fat in Associations of Physical Activity With Lipids and Lipoproteins in a Biethnic Population: The San Luis Valley Diabetes Study, 973

Plant sterols
Sluggish Sitosterol Turnover and Hepatic Failure to Excrete Sitosterol Into Bile Cause Expansion of Body Pool of Sitosterol in Patients With Sitosterolemia and Xanthomatosis, 1287

Plasma cholesterol
Guar Gum and Plasma Cholesterol: Effect of Guar Gum and an Oat Fiber Source on Plasma Lipoproteins and Cholesterol in Hypercholesterolemic Adults, 1204
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Plasma insulin
High Fasting Plasma Insulin Is an Indicator of Coronary Heart Disease in Non–Insulin-Dependent Diabetic Patients and Nondiabetic Subjects, 80
Relation of Fasting Plasma Insulin Concentration to High Density Lipoprotein Cholesterol and Triglyceride Concentrations in Men, 1636

Plasma lipids
Genetic and Environmental Factors Affecting the Incidence of Coronary Artery Disease in Heterozygous Familial Hypercholesterolemia, 290
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Plasma lipoproteins
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077

Plasminogen
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

Plasminogen activation
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

Plasminogen activator inhibitor
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

Plasminogen activator inhibitor-1
Both Circulating and Clot-Bound Plasminogen Activator Inhibitor–1 Inhibit Endogenous Fibrinolysis in the Rat, 1276
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042
Stimulating Effect of Oxidized Low Density Lipoproteins on Plasminogen Activator Inhibitor–1 Synthesis by Endothelial Cells, 1821

Plasminogen activators
Both Circulating and Clot-Bound Plasminogen Activator Inhibitor–1 Inhibit Endogenous Fibrinolysis in the Rat, 1276

Platelet adherence
Alterations in Human Vascular Endothelial Cell Function by Oxygen Free Radicals: Platelet Adherence and Prostacyclin Release, 594

Platelet adhesion
Dose Response of Dietary Fish Oil Supplementations on Platelet Adhesion, 39
Platelet Adhesion to Exposed Endothelial Cell Extracellular Matrixes Is Influenced by the Method of Preparation, 436

Platelet aggregation
A Role for Platelets and Thrombin in the Juvenile Stroke of Two Siblings With Defective Thrombin-Adsorbing Capacity of Fibrin(ogen), 785
Thrombin-Induced Platelet Aggregates Have a Dynamic Structure: Time-Dependent Redistribution of Glycoprotein IIb–IIIa Complexes and Secreted Adhesive Proteins, 704

Platelet deposition
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395

Platelet glycoprotein Ib/IX, animal models
Reduction in Thrombus Formation by PG-1 $F(ab')_2$, an Anti–Guinea Pig Platelet Glycoprotein Ib Monoclonal Antibody, 1231

Platelet hyposensitivity
Platelet Function in Watanabe Heritable Hyperlipidemic Rabbits: Decreased Sensitivity to Thromboxane A_2, 610

Platelet thromboxane formation
Platelet Function in Watanabe Heritable Hyperlipidemic Rabbits: Decreased Sensitivity to Thromboxane A_2, 610

Platelet-activating factor
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Platelet-derived growth factor
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042

Platelets
Defects in Platelet Adhesion and Aggregate Formation in Uremic Bleeding Disorder Can Be Attributed to Factors in Plasma, 733
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395

Reduction in Thrombus Formation by PG-1 F(ab')$_2$, an Anti–Guinea Pig Platelet Glycoprotein Ib Monoclonal Antibody, 1231

Polarized light
Fabric Organization of the Subendothelium of the Human Brain Artery by Polarized-Light Microscopy, 681

Polymerase chain reaction
A Common Genetic Polymorphism Associated With Lower Coagulation Factor VII Levels in Healthy Individuals, 540
The Mutation Causing the Common Apolipoprotein A-IV Polymorphism Is a Glutamine to Histidine Substitution of Amino Acid 360, 851

Polyunsaturated fats
Age and Dietary Polyunsaturated Fat Alter High Density Lipoprotein Subfraction Cholesterol Concentrations in a Pediatric Population of African Green Monkeys, 617

Population comparisons
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089

Population studies
Ultrasonographically Assessed Carotid Morphology and the Risk of Coronary Heart Disease, 1245

Poration
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Postprandial
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Postprandial lipemia
Dissociation Between Postprandial Lipemia and High Density Lipoprotein Cholesterol Concentrations in Endurance-Trained Men, 838

Postprandial lipoproteins
Metabolism of Lipoprotein Remnants in Humans: Studies During Intestinal Infusion of Fat and Cholesterol in Subjects With Varying Expression of the Low Density Lipoprotein Receptor, 827
Postprandial Lipoprotein Metabolism in Normolipidemic Men With and Without Coronary Artery Disease, 653

Pravastatin
Passage State Affects Arachidonic Acid Content and Eicosanoid Release in Porcine Aortic Endothelial Cells, 167
Vastatins Inhibit Cholesterol Ester Accumulation in Human Monocyte-Derived Macrophages, 146

Prevention strategies
Multifactorial Etiology of Hypercholesterolemia: Implications for Prevention of Coronary Heart Disease, 1619

Probucol
Attenuation of Atherosclerosis in a Modified Strain of Hypercholesterolemic Watanabe Rabbits With Use of a Probucol Analogue (MDL 29,311) That Does Not Lower Serum Cholesterol, 1266
Increase in Plasma Cholesteryl Ester Transfer Protein During Probucol Treatment: Relation to Changes in High Density Lipoprotein Composition, 476
Probucol Decreases Apolipoprotein A-I Transport Rate and Increases High Density Lipoprotein Cholesteryl Ester Fractional Catabolic Rate in Control and Human Apolipoprotein A-I Transgenic Mice, 1295
Probucol Treatment Affects the Cellular Composition but Not Anti–Oxidized Low Density Lipoprotein Immunoreactivity of Plaques From Watanabe Heritable Hyperlipidemic Rabbits, 751

Probucol analogue
Attenuation of Atherosclerosis in a Modified Strain of Hypercholesterolemic Watanabe Rabbits With Use of a Probucol Analogue (MDL 29,311) That Does Not Lower Serum Cholesterol, 1266

Prospective studies
Ultrasonographically Assessed Carotid Morphology and the Risk of Coronary Heart Disease, 1245

Prostacyclin
Alterations in Human Vascular Endothelial Cell Function by Oxygen Free Radicals: Platelet Adherence and Prostacyclin Release, 594
Effects of Tumor Necrosis Factor on Prostacyclin Production and the Barrier Function of Human Endothelial Cell Monolayers, 872
Nitric Oxide and Prostacyclin: Divergence of Inhibitory Effects on Monocyte Chemotaxis and Adhesion to Endothelium In Vitro, 254
Passage State Affects Arachidonic Acid Content and Eicosanoid Release in Porcine Aortic Endothelial Cells, 167
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

Prostaglandin E_2
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

Prosthetic grafts
Shear Stress Regulates Smooth Muscle Proliferation and Neointimal Thickening in Porous Polytetrafluoroethylene Grafts, 1844

Protease treatment
High Density Lipoprotein Apolipoproteins Mediate Removal of Sterol From Intracellular Pools but Not From Plasma Membranes of Cholesterol-Loaded Fibroblasts, 403

Protein kinase C
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042

Proteoglycans
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191
Metabolism and Turnover of Cell Surface–Associated Heparan Sulfate Proteoglycan and Chondroitin Sulfate Proteoglycan in Normal and Cholesterol-Enriched Macrophages, 1752
Reduced Proteoglycan Binding of Low Density Lipoproteins From Monkeys *(Macaca fascicularis)* Fed a Fish Oil Versus Lard Diet, 1778
Specificity of the Low Density Lipoprotein–Glycosaminoglycan Interaction, 561

Proto-oncogenes
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042

Psychosocial factors
Waist to Hip Ratio in Middle-Aged Women: Associations With Behavioral and Psychosocial Factors and With Changesin Cardiovascular Risk Factors, 1250

Pulsed Doppler flow meter
Enhanced Constriction of the Peripheral Large Artery in Response to Acute Induction of a Low-Flow State in Human Hypercholesterolemia, 161

Q

Quantitative immunotransblot assay
Activation of Calpain I and Hydrolysis of Calpain Substrates (Actin-Binding Protein, Glycoprotein Ib, and Talin) Are Not a Function of Thrombin-Induced Platelet Aggregation, 882

R

Rabbit antithrombin III isoforms
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530

Rabbit aortas
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517

Rabbits
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745
Leukocytosis in Rabbits With Diet-Induced Atherosclerosis, 985
Lipid Accumulation in Rabbit Aortic Intima 2 Hours After Bolus Infusion of Low Density Lipoprotein: A Deep-Etch and Immunolocalization Study of Ultrarapidly Frozen Tissue, 1795
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

Rats
Expression of Lipoprotein Lipase mRNA in Rat Heart Is Localized Mainly to Mesenchymal Cells as Studied by In Situ Hybridization, 857
Peritoneal Macrophage Cholesteryl Ester Content as a Function of Plasma Cholesterol in Rats, 1111
Reduction of Transmural ^{125}I-Albumin Concentration in Rat Aortic Media by Chronic Hypertension, 334

Receptor display
Display of Low Density Lipoprotein Receptors Is Clustered, Not Dispersed, in Fibroblast and Hepatocyte Plasma Membranes, 261

Regression
Use of Serum Lipid and Apolipoprotein Concentrations to Predict Extent of Diet-Induced Atherosclerotic Lesions in Aortas and Coronary Arteries and to Demonstrate Regression of Lesions in Individual Rhesus Monkeys, 467

Reliability
Evaluation of Human Panelists in Assessing Coronary Atherosclerosis, 385

Restriction fragment length polymorphisms
Genetic Variation at the Plasminogen Activator Inhibitor-1 Locus Is Associated With Altered Levels of Plasma Plasminogen Activator Inhibitor-1 Activity, 183
Variation in the Low Density Lipoprotein Receptor Gene Is Associated With Differences in Plasma Low Density Lipoprotein Cholesterol Levels in Young and Old Normal Individuals From Italy, 509

Retinyl esters
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Retrovirus
Atherosclerosis: Chronic Effects of Fish Oil and a Therapeutic Diet in Nonhuman Primates, 719

Reverse cholesterol transport
Detection of Two Species of Low Density Lipoprotein Particles in Cholesteryl Ester Transfer Protein Deficiency, 71
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Right coronary artery
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237

Risk factors
Central Adipose Distribution Is Related to Coronary Atherosclerosis, 327
Effects of Polymorphisms in Apolipoproteins E, A-IV, and H on Quantitative Traits Related to Risk for Cardiovascular Disease, 1330
Plasma Fibrinogen and Ischemic Heart Disease Risk Factors, 344
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

S

Sergolexole
Effects of Serotonin-Receptor Blockade on Angioplasty-Induced Vasospasm in an Atherosclerotic Rabbit Model, 770

Serotonin
Comparison of Early Microcirculatory and Aortic Changes in Hypercholesterolemic Rats, 154
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639
Vascular Responses to Platelet Activation in Normal and Atherosclerotic Primates In Vivo, 1745

Serotonin-receptor blockade
Effects of Serotonin-Receptor Blockade on Angioplasty-Induced Vasospasm in an Atherosclerotic Rabbit Model, 770

Serum cholesterol
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237
Cholesterol-Raising Factor From Boiled Coffee Does Not Pass a Paper Filter, 586
Effect of Interleukin-1 on Lipid Metabolism in the Rat: Similarities to and Differences From Tumor Necrosis Factor, 495
Use of Serum Lipid and Apolipoprotein Concentrations to Predict Extent of Diet-Induced Atherosclerotic Lesions in Aortas and Coronary Arteries and to Demonstrate Regression of Lesions in Individual Rhesus Monkeys, 467

Serum protein homocysteinylation
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663

Serum triglycerides
Effect of Interleukin-1 on Lipid Metabolism in the Rat: Similarities to and Differences From Tumor Necrosis Factor, 495

Sex hormones
Endogenous Sex Hormones, High Density Lipoprotein Cholesterol, and Other Lipoprotein Fractions in Men, 489

Seychelles
High Prevalence of Cardiovascular Risk Factors in the Seychelles (Indian Ocean), 1730

Shear rate
Effect of Aspirin and Epinephrine on Experimentally Induced Thrombogenesis in Dogs: A Parallelism Between In Vivo and Ex Vivo Thrombosis Models, 1182
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395
Quantification of Fibrin Deposition in Flowing Blood With Peroxidase-Labeled Fibrinogen: High Shear Rates Induce Decreased Fibrin Deposition and Appearance of Fibrin Monomers, 211

Shear stress
Reduction of Endothelial Microfilament Bundles in the Low-Shear Region of the Canine Aorta: Association With Intimal Plaque Formation in Hypercholesterolemia, 107
Shear Stress Regulates Smooth Muscle Proliferation and Neointimal Thickening in Porous Polytetrafluoroethylene Grafts, 1844

Signal transduction
Endothelial Cells Reestablish Functional Integrity After Reversible Permeabilization, 97

Simvastatin
Comparison Between Morning and Evening Doses of Simvastatin in Hyperlipidemic Subjects: A Double-Blind Comparative Study, 816
Treatment With Hydroxymethylglutaryl–Coenzyme A Reductase Inhibitors in Hypercholesterolemia Induces Changes in the Components of the Extrinsic Coagulation System, 138

Smoking
Genetic and Environmental Factors Affecting the Incidence of Coronary Artery Disease in Heterozygous Familial Hypercholesterolemia, 290

Smooth muscle
Aortic Intimal Thickening and Myosin Isoform Expression in Hyperthyroid Rabbits, 1376
Fabric Organization of the Subendothelium of the Human Brain Artery by Polarized-Light Microscopy, 681

Smooth muscle cells
A Nifedipine-Sensitive Smooth Muscle Cell Population Is Present in the Atherosclerotic Rabbit Aorta, 928
Aortic Intimal Thickening and Myosin Isoform Expression in Hyperthyroid Rabbits, 1376
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Expression of Monocyte Chemotactic Protein and Interleukin-8 by Cytokine-Activated Human Vascular Smooth Muscle Cells, 1166
Oxidation of β-Very Low Density Lipoprotein by Endothelial Cells Enhances Its Metabolism by Smooth Muscle Cells in Culture, 279

Smooth muscle phenotype
Effects of Injury and Insulin on Lipid Synthesis From Glucose by the Rat Thoracic Aorta, 91

Smooth muscle proliferation
Shear Stress Regulates Smooth Muscle Proliferation and Neointimal Thickening in Porous Polytetrafluoroethylene Grafts, 1844

Solid-phase fibrin
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629

South Africa
Relation of Family History and Reversible Risk Factors to Coronary Heart Disease Prevalence in an Afrikaner Community, 130

Southern blotting analysis
Characterization of Three Mutations of the Low Density Lipoprotein Receptor Gene in Italian Patients With Familial Hypercholesterolemia, 234

SP-40,40
Characterization of a Human High Density Lipoprotein–Associated Protein, NA1/NA2: Identity With SP-40,40, an Inhibitor of Complement-Mediated Cytolysis, 645

SPARC
Modulation of Extracellular Matrix Proteins by Endothelial Cells Undergoing Angiogenesis In Vitro, 805

Spontaneously hypertensive rats
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Steroid hormones
Variable Effects of Different Corticosteroids on Plasma Lipids, Apolipoproteins, and Hepatic Apolipoprotein mRNA Levels in Rats, 760

Strength training
Effects of Exercise Training on Cardiovascular Function and Plasma Lipid, Lipoprotein, and Apolipoprotein Concentrations in Premenopausal and Postmenopausal Women, 912

Subendothelium
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530

Sulfoproteins
Effect of Diet-Induced Hypercholesterolemia on Proteoglycan Metabolism in Guinea Pig Megakaryocytes and Platelets, 191

Synergistic effects
A Role for Platelets and Thrombin in the Juvenile Stroke of Two Siblings With Defective Thrombin-Adsorbing Capacity of Fibrin(ogen), 785

T

T lymphocytes
Immunohistochemical Detection of Macrophages and T Lymphocytes in Atherosclerotic Lesions of Cholesterol-Fed Rabbits, 745

Tangier disease
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

Tangier fibroblasts
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

Tangier macrophages
Abnormal Processing of Golgi Elements and Lysosomes in Tangier Disease, 1007

Testosterone
Endogenous Sex Hormones, High Density Lipoprotein Cholesterol, and Other Lipoprotein Fractions in Men, 489
Relation of Serum Testosterone Levels to High Density Lipoprotein Cholesterol and Other Characteristics in Men, 307

Tetramyristic phorbol acetate
Lipoprotein Receptors of HL-60 Macrophages: Effect of Differentiation With Tetramyristic Phorbol Acetate and 1,25-Dihydroxyvitamin D_3, 995

Thiolactone hydrolysis
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663

Thoracic aorta
Apolipoprotein E Polymorphisms Affect Atherosclerosis in Young Males, 1237

Thrombin
A Role for Platelets and Thrombin in the Juvenile Stroke of Two Siblings With Defective Thrombin-Adsorbing Capacity of Fibrin(ogen), 785
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639
Thrombin-Induced Platelet Aggregates Have a Dynamic Structure: Time-Dependent Redistribution of Glycoprotein IIb–IIIa Complexes and Secreted Adhesive Proteins, 704

Thrombin inactivation
Antithrombin III-β Associates More Readily Than Antithrombin III-α With Uninjured and De-endothelialized Aortic Wall In Vitro and In Vivo, 530

Thrombosis
A Common Genetic Polymorphism Associated With Lower Coagulation Factor VII Levels in Healthy Individuals, 540
Both Circulating and Clot-Bound Plasminogen Activator Inhibitor–1 Inhibit Endogenous Fibrinolysis in the Rat, 1276
Effect of Aspirin and Epinephrine on Experimentally Induced Thrombogenesis in Dogs: A Parallelism Between In Vivo and Ex Vivo Thrombosis Models, 1182
Homocysteine Thiolactone Disposal by Human Arterial Endothelial Cells and Serum In Vitro, 663
Platelet Deposition at High Shear Rates Is Enhanced by High Plasma Cholesterol Levels: In Vivo Study in the Rabbit Model, 395
Reduction in Thrombus Formation by PG-1 $F(ab')_2$, an Anti–Guinea Pig Platelet Glycoprotein Ib Monoclonal Antibody, 1231

Thromboxane
Vascular Responses to Platelet Activation in Normal and Atherosclerotic Primates In Vivo, 1745

Thromboxane A_2
Long-term Cholesterol Feeding Alters the Reactivity of Primate Coronary Microvessels to Platelet Products, 639

Thromboxane B_2
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

Thrombus formation
Quantification of Fibrin Deposition in Flowing Blood With Peroxidase-Labeled Fibrinogen: High Shear Rates Induce Decreased Fibrin Deposition and Appearance of Fibrin Monomers, 211

Thymidine index
Intimal Alterations in Rabbit Aortas During the First 6 Months of Alloxan-Induced Diabetes, 517

Thymodependent lymphocytes
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Thyroid hormones
Aortic Intimal Thickening and Myosin Isoform Expression in Hyperthyroid Rabbits, 1376

Tissue accumulation
Sluggish Sitosterol Turnover and Hepatic Failure to Excrete Sitosterol Into Bile Cause Expansion of Body Pool of Sitosterol in Patients With Sitosterolemia and Xanthomatosis, 1287

Tissue inhibitor of metalloproteinase
Connective Tissue Proteinases and Inhibitors in Abdominal Aortic Aneurysms: Involvement of the Vasa Vasorum in the Pathogenesis of Aortic Aneurysms, 1667

Tissue-type plasminogen activator
Both Circulating and Clot-Bound Plasminogen Activator Inhibitor–1 Inhibit Endogenous Fibrinolysis in the Rat, 1276
Lipoprotein(a) Impairs Generation of Plasmin by Fibrin-Bound Tissue-Type Plasminogen Activator: In Vitro Studies in a Plasma Milieu, 629
Role of Protein Kinase C and Cyclic Adenosine Monophosphate in the Regulation of Tissue-Type Plasminogen Activator, Plasminogen Activator Inhibitor-1, and Platelet-Derived Growth Factor mRNA Levels in Human Endothelial Cells: Possible Involvement of Proto-oncogenes c-*jun* and c-*fos*, 1042

Transfection
Transforming Potential Is Detectable in Arteriosclerotic Plaques of Young Animals, 1053

Transforming factor
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Transforming genes
Transforming Potential Is Detectable in Arteriosclerotic Plaques of Young Animals, 1053

Transforming growth factor–β
Collagen Synthesis in Cultured Aortic Smooth Muscle Cells: Modulation by Collagen Lattice Culture, Transforming Growth Factor–β1, and Epidermal Growth Factor, 1660
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223

Transgenic mice
Probucol Decreases Apolipoprotein A-I Transport Rate and Increases High Density Lipoprotein Cholesteryl Ester Fractional Catabolic Rate in Control and Human Apolipoprotein A-I Transgenic Mice, 1295

Transport rate
Probucol Decreases Apolipoprotein A-I Transport Rate and Increases High Density Lipoprotein Cholesteryl Ester Fractional Catabolic Rate in Control and Human Apolipoprotein A-I Transgenic Mice, 1295

Triacylglycerides
Moderate Fish Oil Intake Improves Lipemic Response to a Standard Fat Meal: A Study in 25 Healthy Men, 457
The Effect of Fasting Triacylglyceride Concentration and Apolipoprotein E Polymorphism on Postprandial Lipemia, 1737

Triglycerides
Cholesterol Accumulation in J774 Macrophages Induced by Triglyceride-Rich Lipoproteins: Comparison of Very Low Density Lipoprotein From Subjects With Type III, IV, and V Hyperlipoproteinemias, 221
Dissociation Between Postprandial Lipemia and High Density Lipoprotein Cholesterol Concentrations in Endurance-Trained Men, 838
Nutrient Intake Comparisons Between Framingham and Rural and Urban Puriscal, Costa Rica: Associations With Lipoproteins, Apolipoproteins, and Low Density Lipoprotein Particle Size, 1089
Plasma Triglyceride and Coronary Heart Disease, 2
Relation of Fasting Plasma Insulin Concentration to High Density Lipoprotein Cholesterol and Triglyceride Concentrations in Men, 1636
Relations of Body Habitus, Fitness Level, and Cardiovascular Risk Factors Including Lipoproteins and Apolipoproteins in a Rural and Urban Costa Rican Population, 1077
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Tumor necrosis factor
Cytokines and Growth Factors Positively and Negatively Regulate Interstitial Collagen Gene Expression in Human Vascular Smooth Muscle Cells, 1223
Effect of Interleukin-1 on Lipid Metabolism in the Rat: Similarities to and Differences From Tumor Necrosis Factor, 495
Effects of Tumor Necrosis Factor on Prostacyclin Production and the Barrier Function of Human Endothelial Cell Monolayers, 872
Expression of Monocyte Chemotactic Protein and Interleukin-8 by Cytokine-Activated Human Vascular Smooth Muscle Cells, 1166

Tumors
Transforming Potential Is Detectable in Arteriosclerotic Plaques of Young Animals, 1053

Turnover
Sluggish Sitosterol Turnover and Hepatic Failure to Excrete Sitosterol Into Bile Cause Expansion of Body Pool of Sitosterol in Patients With Sitosterolemia and Xanthomatosis, 1287

Twins
Genetic and Environmental Contributions to Cholesterol and Its Subfractions in 11-Year-Old Twins: The Medical College of Virginia Twin Study, 844

Type IIa hyperlipoproteinemia
Effects of Three Genetic Loci in a Pedigree With Multiple Lipoprotein Phenotypes, 1349

Type III hyperlipidemia
Type III Dyslipoproteinemia in Patients Heterozygous for Familial Hypercholesterolemia and Apolipoprotein E2: Evidence for a Gene–Gene Interaction, 1137

Type III/type IV dyslipidemias
Fish Oil Supplementation Reduces β–Very Low Density Lipoprotein in Type III Dysbetalipoproteinemia, 864

U

Ultrasonography
Progression and Regression of Carotid Atherosclerosis in Clinical Trials, 443

Unsaturated dietary fats
Effects of n-3 and n-6 Fatty Acid–Enriched Diets on Plasma Lipoproteins and Apolipoproteins in Heterozygous Familial Hypercholesterolemia, 47

Unsaturated fatty acids
Effects of n-3 and n-6 Fatty Acid–Enriched Diets on Plasma Lipoproteins and Apolipoproteins in Heterozygous Familial Hypercholesterolemia, 47

Unstable angina
Transient Increase of Plasma Lipoprotein(a) in Patients With Unstable Angina Pectoris: Does Lipoprotein(a) Alter Fibrinolysis?, 1772

Upregulation of low density lipoprotein receptor expression
Enhanced Uptake and Impaired Intracellular Metabolism of Low Density Lipoprotein Complexed With Anti–Low Density Lipoprotein Antibodies, 1356

Uremia
Defects in Platelet Adhesion and Aggregate Formation in Uremic Bleeding Disorder Can Be Attributed to Factors in Plasma, 733

Urinary prostanoid metabolites
Synthesis of Prostaglandins and Thromboxane B_2 by Cholesterol-Fed Rabbits, 501

V

Vasa vasorum
Connective Tissue Proteinases and Inhibitors in Abdominal Aortic Aneurysms: Involvement of the Vasa Vasorum in the Pathogenesis of Aortic Aneurysms, 1667

Vascular development
Modulation of Actin Isoform Expression in Cultured Arterial Smooth Muscle Cells by Heparin and Culture Conditions, 244

Vascular disease
Cardiovascular Disease and Arterial Calcification in Insulin-Dependent Diabetes Mellitus: Interrelations and Risk Factor Profiles: Pittsburgh Epidemiology of Diabetes Complications Study-V, 958

Vascular reactivity
Hypercholesterolemia and Atherosclerosis Change Vascular Reactivity in Rabbits by Different Mechanisms, 1712

Vascular smooth muscle
Effects of Transforming Growth Factor-β1 on Human Arterial Smooth Muscle Cells In Vitro, 892

Vasculitis
Expression of Monocyte Chemotactic Protein and Interleukin-8 by Cytokine-Activated Human Vascular Smooth Muscle Cells, 1166

Vasoconstriction
Changes in Vasoconstrictor and Vasodilator Responses of the Basilar Artery During Maturation in the Watanabe Heritable Hyperlipidemic Rabbit Differ From Those in the New Zealand White Rabbit, 1147

Vasodilatation
Changes in Vasoconstrictor and Vasodilator Responses of the Basilar Artery During Maturation in the Watanabe Heritable Hyperlipidemic Rabbit Differ From Those in the New Zealand White Rabbit, 1147

Vasospasm
Effects of Native and Oxidized Low Density Lipoproteins on Formation and Inactivation of Endothelium-Derived Relaxing Factor, 198
Effects of Serotonin-Receptor Blockade on Angioplasty-Induced Vasospasm in an Atherosclerotic Rabbit Model, 770
Hypercholesterolemia and Atherosclerosis Change Vascular Reactivity in Rabbits by Different Mechanisms, 1712

Very low density lipoprotein turnover
Mechanisms of Hypertriglyceridemia in the Coconut Oil/Cholesterol-Fed Rabbit: Increased Secretion and Decreased Catabolism of Very Low Density Lipoprotein, 918

Very low density lipoproteins
Hepatic Lipase Promotes a Loss of Apolipoprotein A-I From Triglyceride-Enriched Human High Density Lipoproteins During Incubation In Vitro, 415
Hypolipidemic Effect of β,β'-Tetramethyl Hexadecanedioic Acid (MEDICA 16) in Hyperlipidemic JCR::LA-Corpulent Rats, 602
Net Mass Transfer of Cholesteryl Esters From Low Density Lipoproteins to High Density Lipoproteins in Plasma From Normolipidemic Subjects, 55
Quantitative Studies of Transfer In Vivo of Low Density, Sf 12–60, and Sf 60–400 Lipoproteins Between Plasma and Arterial Intima in Humans, 569
Will a High-Carbohydrate, Low-Fat Diet Lower Plasma Lipids and Lipoproteins Without Producing Hypertriglyceridemia?, 1059

Vitamin E
Enhanced Susceptibility to In Vitro Oxidation of the Dense Low Density Lipoprotein Subfraction in Healthy Subjects, 298

Von Willebrand factor
Inhibition of Platelet Retention on Artificial Microvascular Grafts With Monoclonal Antibodies and a High-Affinity Peptide Directed Against Platelet Membrane Glycoproteins, 552

W

Waist to hip ratio
Waist to Hip Ratio in Middle-Aged Women: Associations With Behavioral and Psychosocial Factors and With Changesin Cardiovascular Risk Factors, 1250

Watanabe heritable hyperlipidemic rabbits
Attenuation of Atherosclerosis in a Modified Strain of Hypercholesterolemic Watanabe Rabbits With Use of a Probucol Analogue (MDL 29,311) That Does Not Lower Serum Cholesterol, 1266
Changes in Vasoconstrictor and Vasodilator Responses of the Basilar Artery During Maturation in the Watanabe Heritable Hyperlipidemic Rabbit Differ From Those in the New Zealand White Rabbit, 1147
Increased Removal of β–Very Low Density Lipoproteins After Ethinyl Estradiol Is Associated With Increased mRNA Levels for Hepatic Lipase, Lipoprotein Lipase, and the Low Density Lipoprotein Receptor in Watanabe Heritable Hyperlipidemic Rabbits, 1652
Probucol Treatment Affects the Cellular Composition but Not Anti–Oxidized Low Density Lipoprotein Immunoreactivity of Plaques From Watanabe Heritable Hyperlipidemic Rabbits, 751

Water-soluble dietary fiber
Guar Gum and Plasma Cholesterol: Effect of Guar Gum and an Oat Fiber Source on Plasma Lipoproteins and Cholesterol in Hypercholesterolemic Adults, 1204

Wistar-Kyoto rats
Allograft-Induced Arterial Wall Injury and Response in Normotensive and Spontaneously Hypertensive Rats, 1690

Women
Risk Factors for Early Carotid Atherosclerosis in Middle-Aged French Women, 966

X

Xanthomatosis
Sluggish Sitosterol Turnover and Hepatic Failure to Excrete Sitosterol Into Bile Cause Expansion of Body Pool of Sitosterol in Patients With Sitosterolemia and Xanthomatosis, 1287
